COLUMBUS

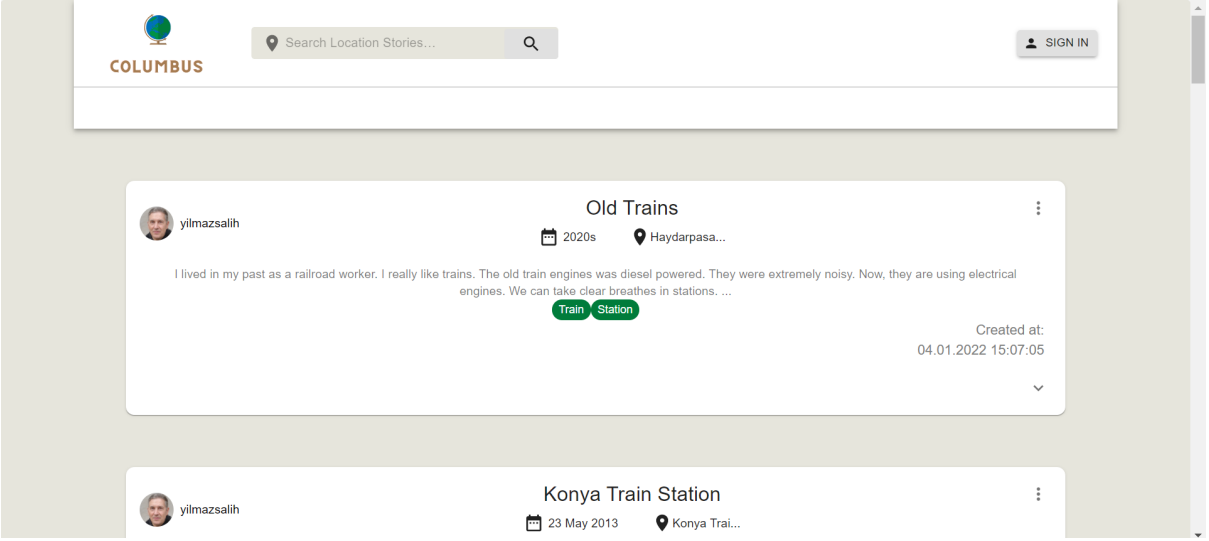
User Manual

Columbus is a location story sharing platform where users can contribute to location histories by telling their stories to other users.

WEB

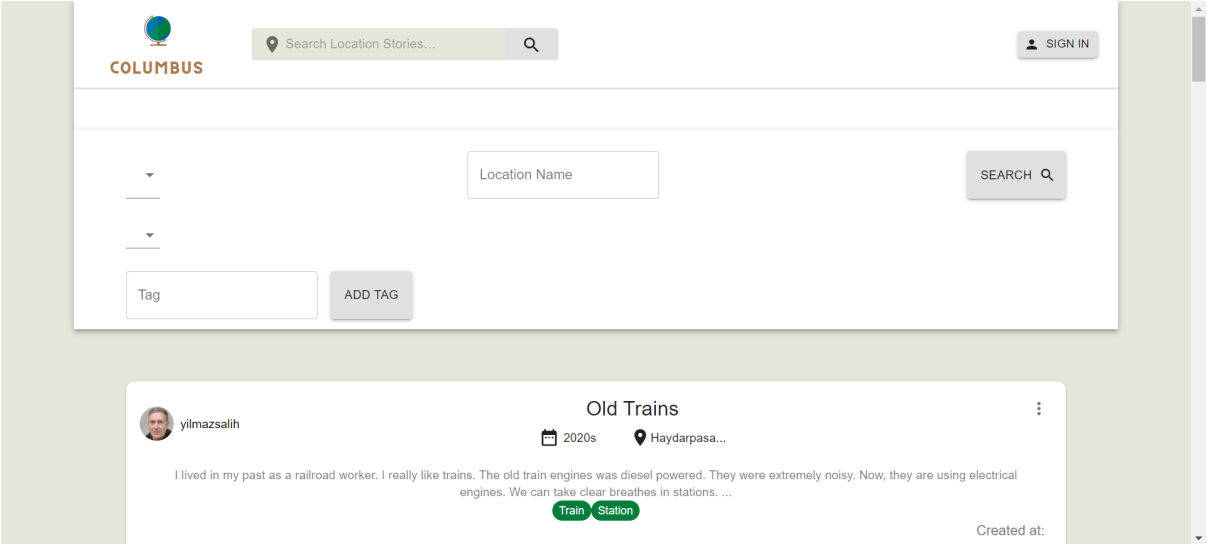
Guest

Before you register to Columbus, you are considered as '*Guest*' and able to perform a limited set of actions on the application.
You can view the explore page and the stories in it, but you are not able to like these stories or make comments on them. Also you cannot view user profiles.
Guest Page:



When you are a *guest,* you can still perform search functionality as users by clicking the search icon in the search bar.

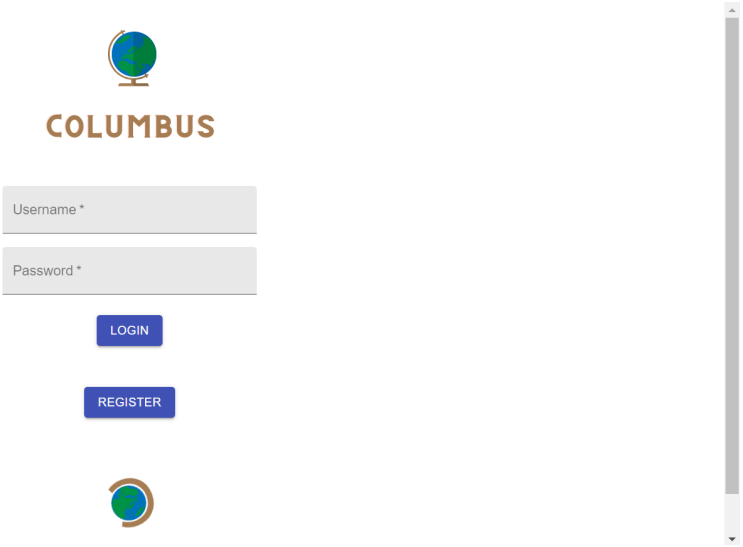
Search Page:



REGISTER

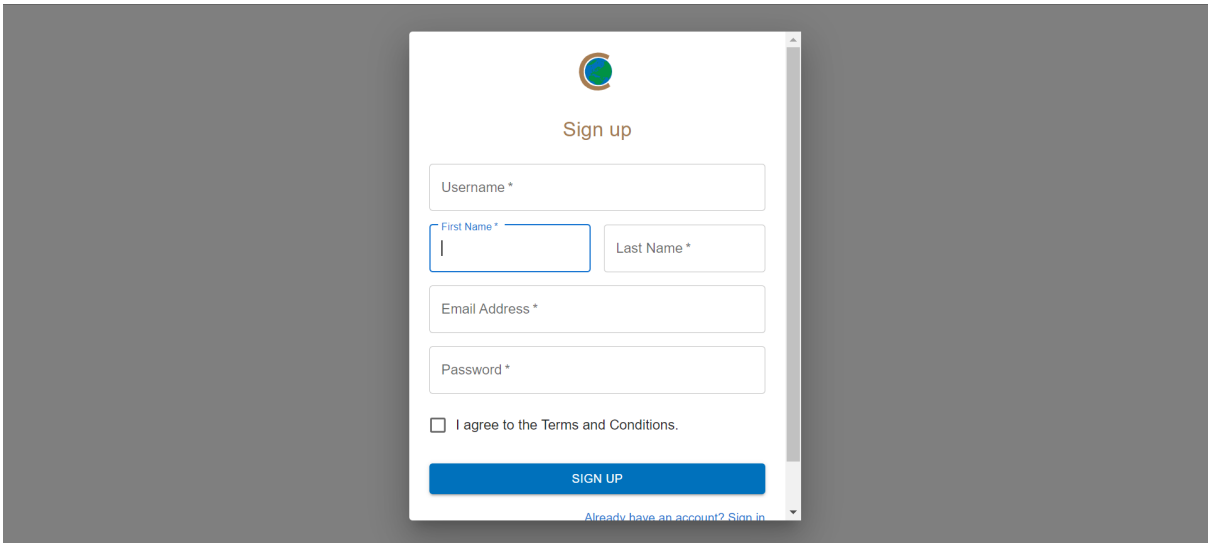
If you want to create a profile for yourself, you can click the Sign In button where it redirects you to the Login/Register page.

Login Page:

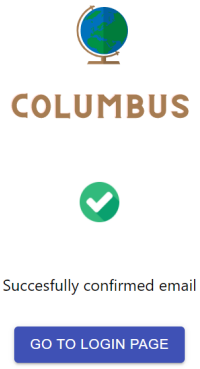


Click the Register button to open the Register dialog. You can register if you provide your username, first name, last name, email address and a password. Also, you must accept the Terms and Conditions to register.

Register Dialog:



After clicking the Sign Up button, a verification code will be sent to your email. When you click this link, you will be able to login to the Columbus application with your credentials.

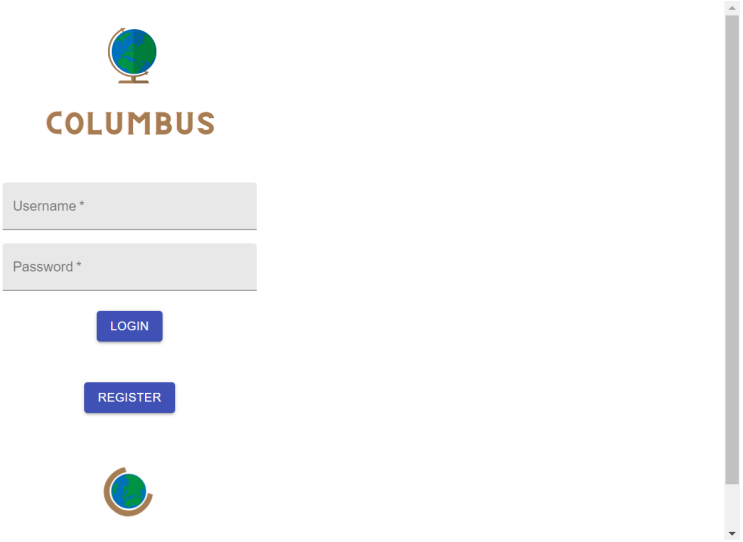


User

LOGIN

If you have already created an account for Columbus, you are considered as a *User.*

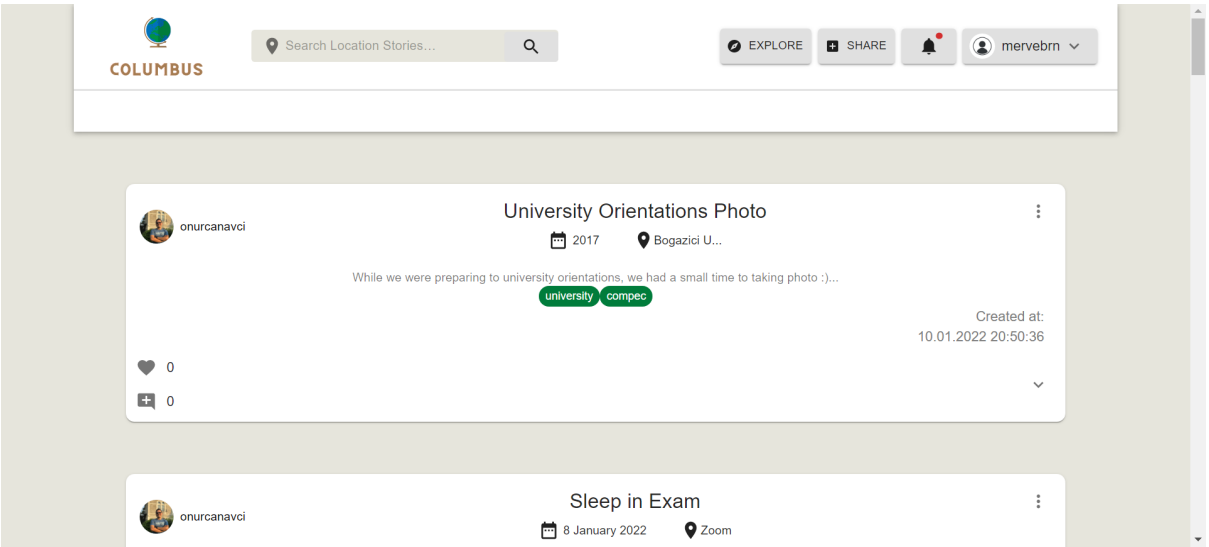
You should login by entering your username and password.



HOME

When you logged in to the application, the home page will welcome you. This page contains posts from your followings. You can access all functionalities of posts from here.

Home Page:

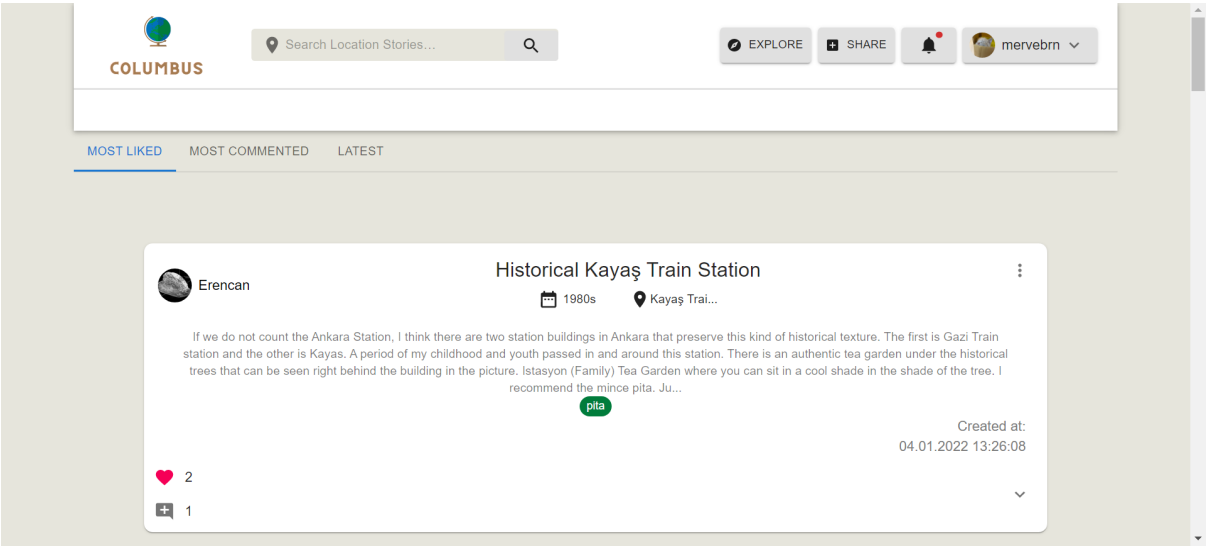


You can also reach that page by clicking the Columbus logo on the left side of the header.

EXPLORE

To explore new stories, you can click the Explore button in the header. There are three tabs displaying other user stories: Most Liked, Most Commented, Latest.

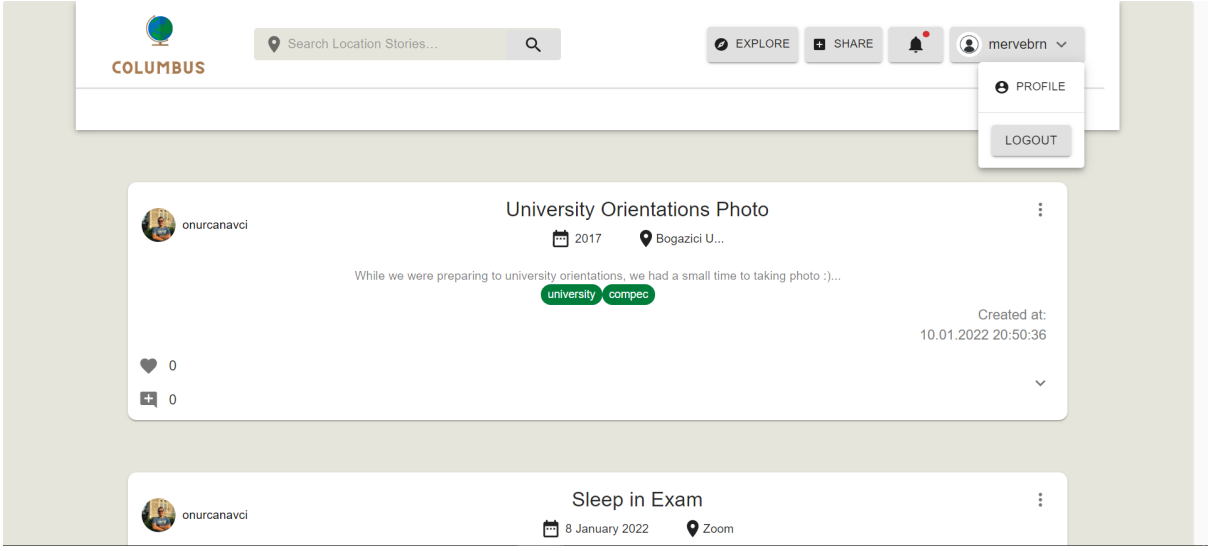
Explore Page:



USER'S OWN PROFILE

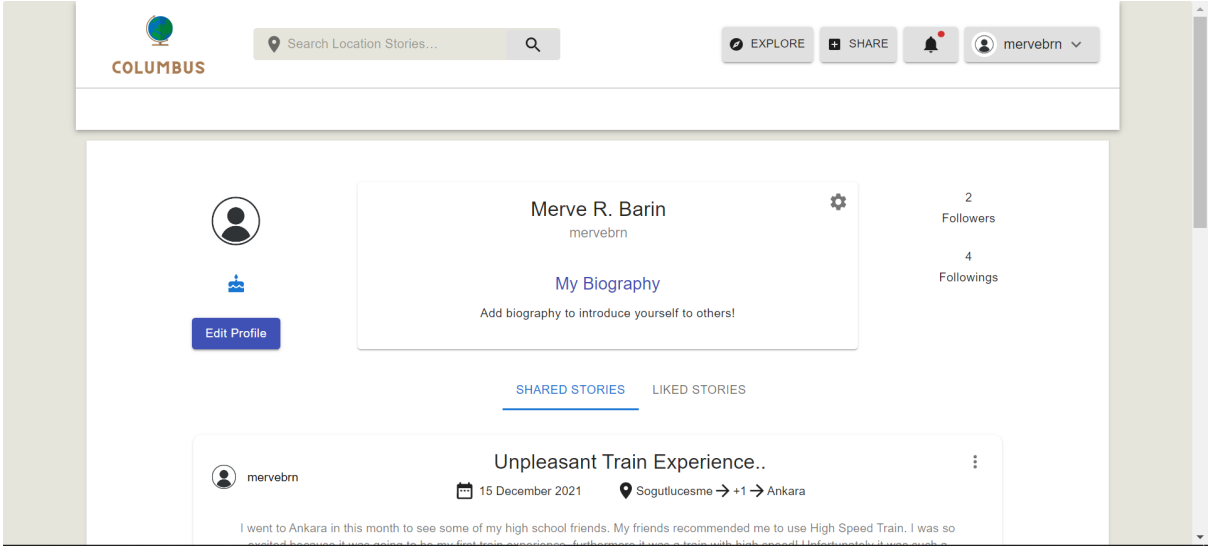
To access your profile, you can click the Profile button from the menu in the header.

Profile Navigation Button:



In your profile page, you can view/edit your profile information, view posts (stories) that you have shared and you have liked, view followings and followers,

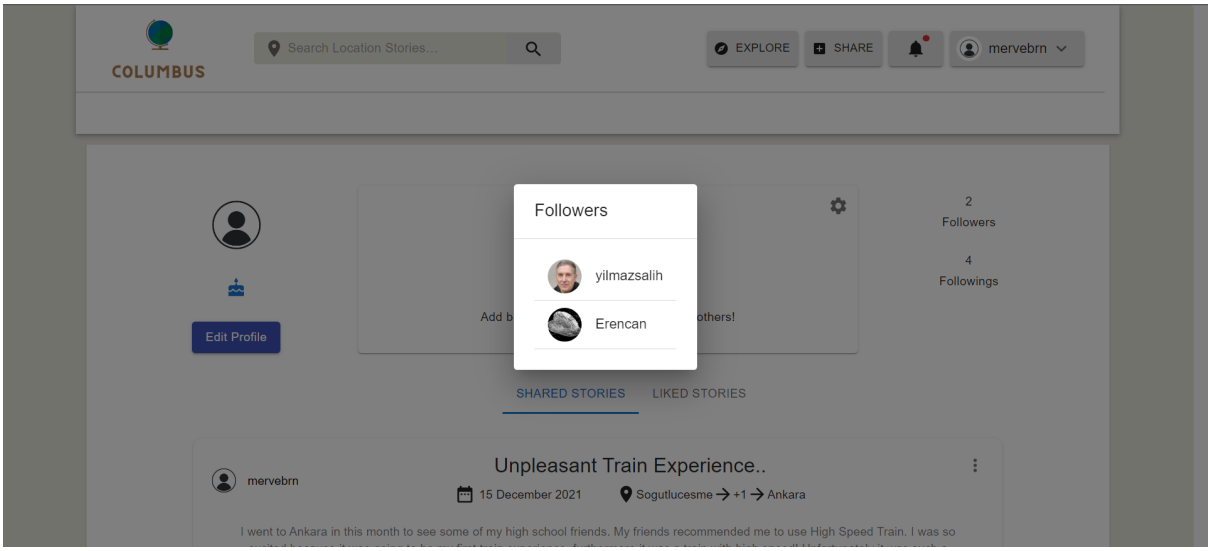
Profile Page:



Followers/Followings

You can see your followers or followings by clicking the relevant button. The dialog you will see when you click the *Followers* button is as below. You can also navigate to another user's profile by clicking their username.

View Followers:

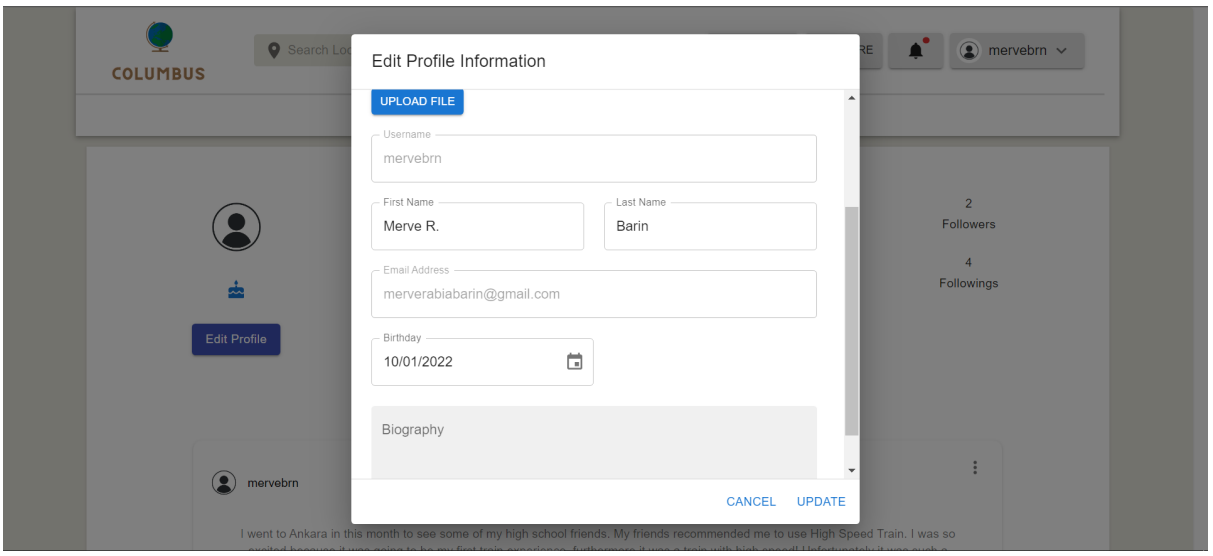


Edit Profile Information

If you want to change or add something new to your profile information, you may click the Edit *Profile* button.

You can add/change profile photo, first name, last name, birthday, biography. *You cannot change your username, email or password.*

Edit Profile Information:



Profile Visibility

There are two profile visibility options for a user's profile: ***Public*** and ***Private***.

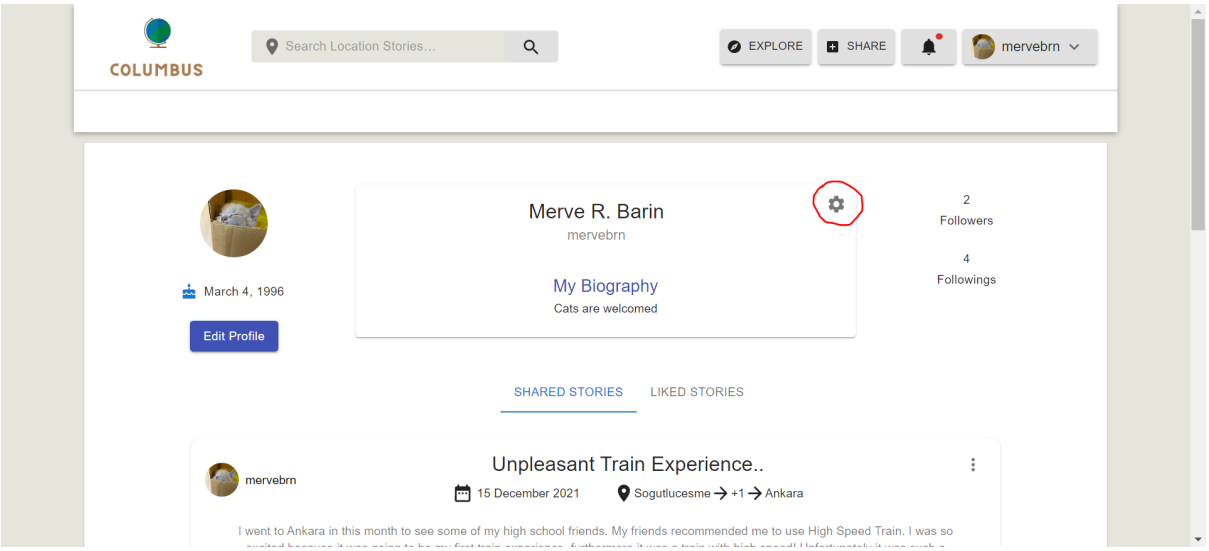
Public Mode

All users can see profile information, the posts and followers/followings of public users.

Private Mode

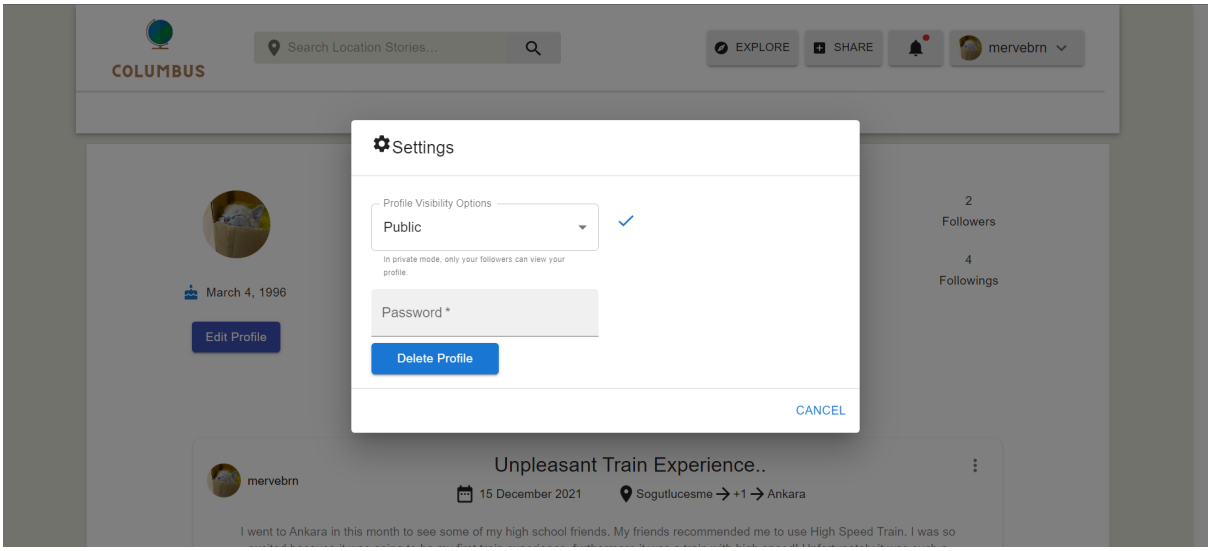
In private mode, only your followers can view your posts and profile information.

When you register for the Columbus app, your profile is *public in default*. You can change it from Settings. Click settings icon to open Settings Dialog.

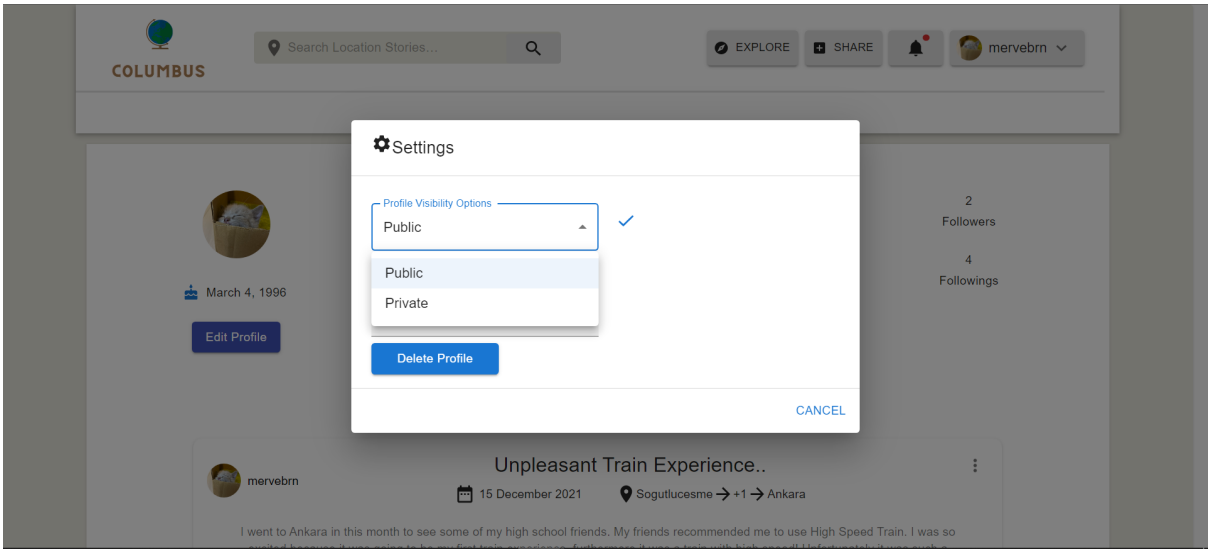


You can also delete your profile in Settings by entering your password.

Settings:



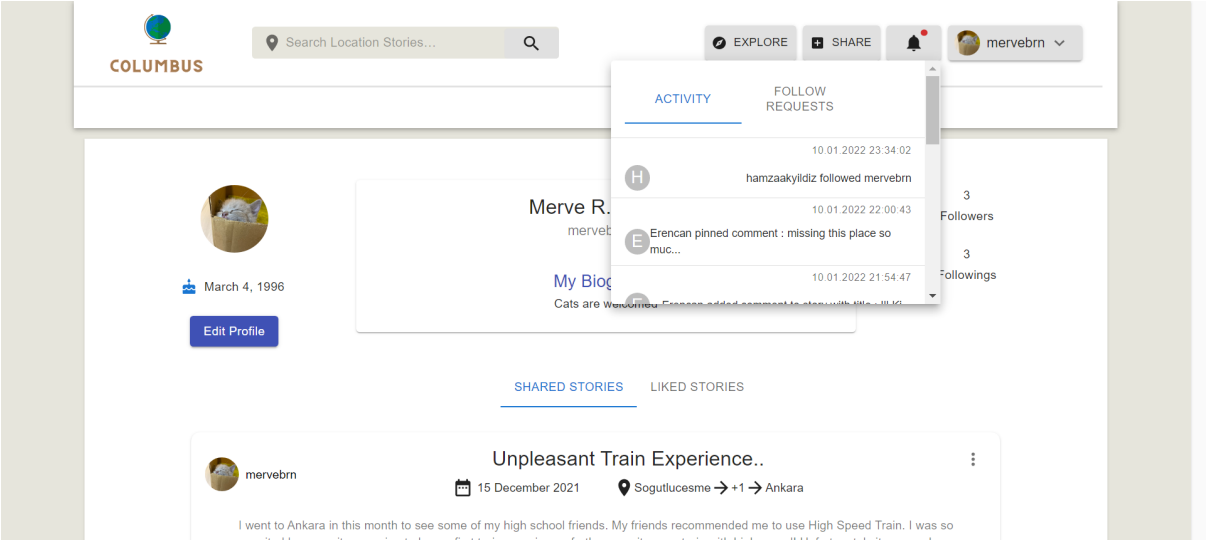
Profile Visibility Modes in Settings:



Notification Box

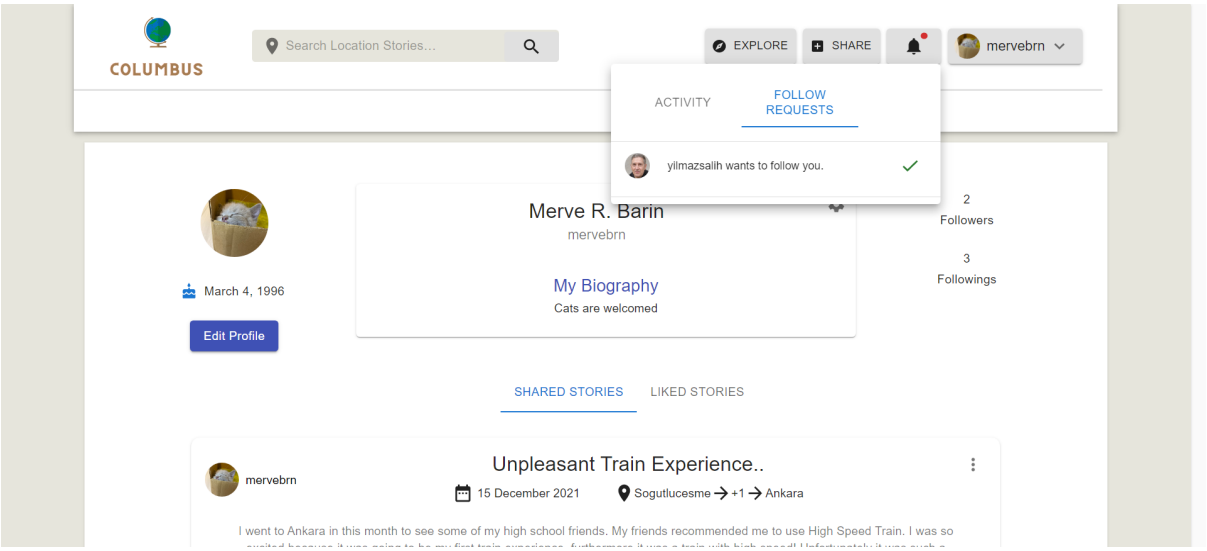
Activities: A user can view the system activities of its followings and followers in Activities tab. You can access Activities by clicking the Notification button in the header.

Viewing Activities:



Follow Requests: If you have a private profile, other users should send a request to follow you. You can see these users in Follow Requests tab.

Viewing Follow Requests:



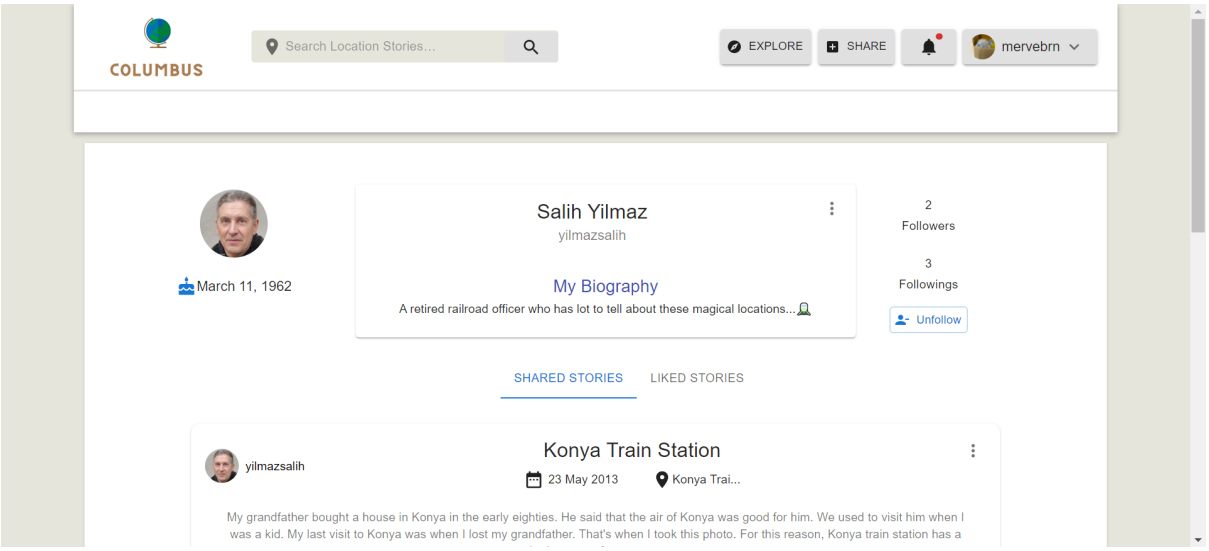
OTHER USER'S PROFILE

Users of the Columbus application are able to view the profiles of other users.

Public Profiles

If a user has a public profile, other users can view its profile information (*username, first name, last name, biography, birthday, profile photo*), posts that the user has shared and liked, user's followers and followings.

Viewing a Public Profile:

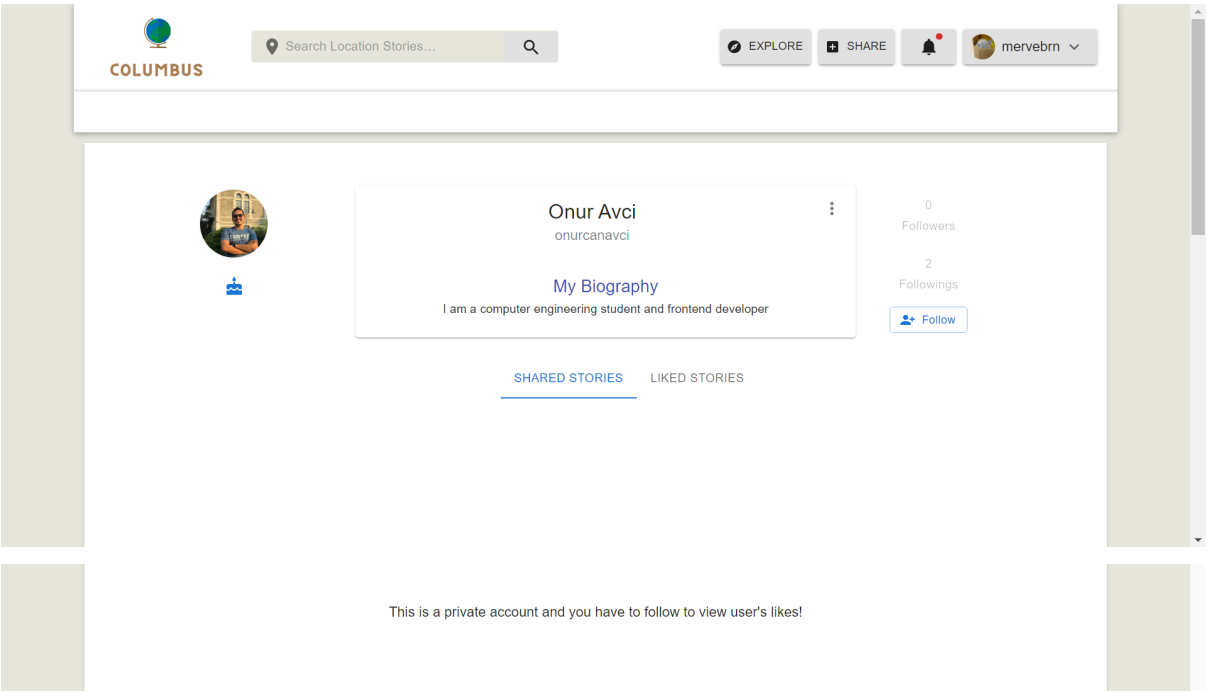


Private Profiles

If a user has a private profile, other users that do not follow the user can only view its *username, first name, last name, biography, profile photo.* They cannot view the posts that the user has shared and liked, the user's followers and followings.

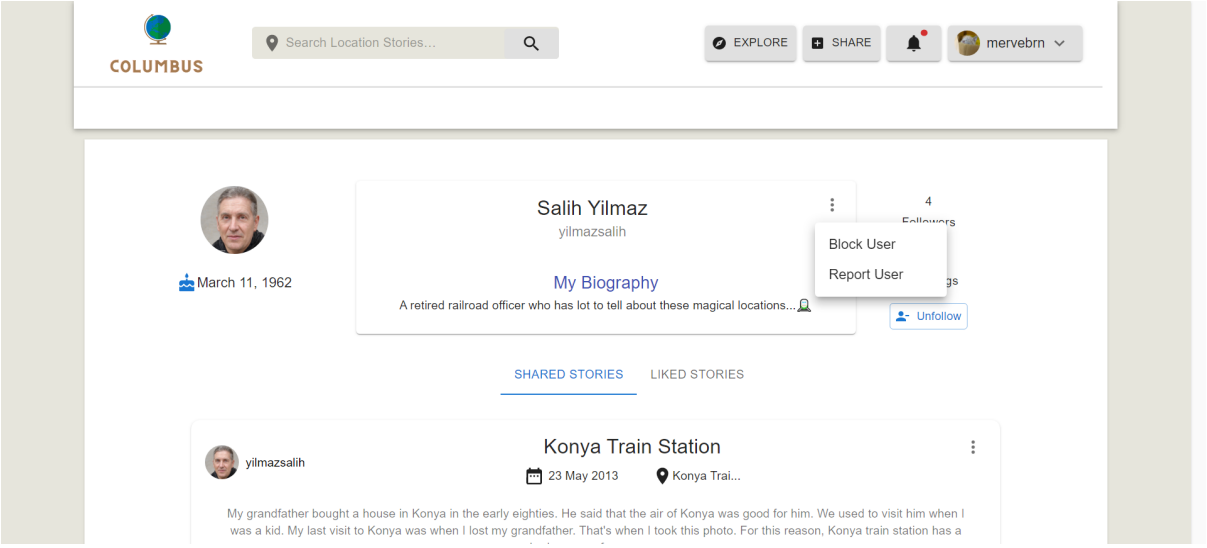
You can *send a follow request* by *clicking the Follow button* and wait for the user to accept your follow request.

Viewing a Private Profile:



Block Other User

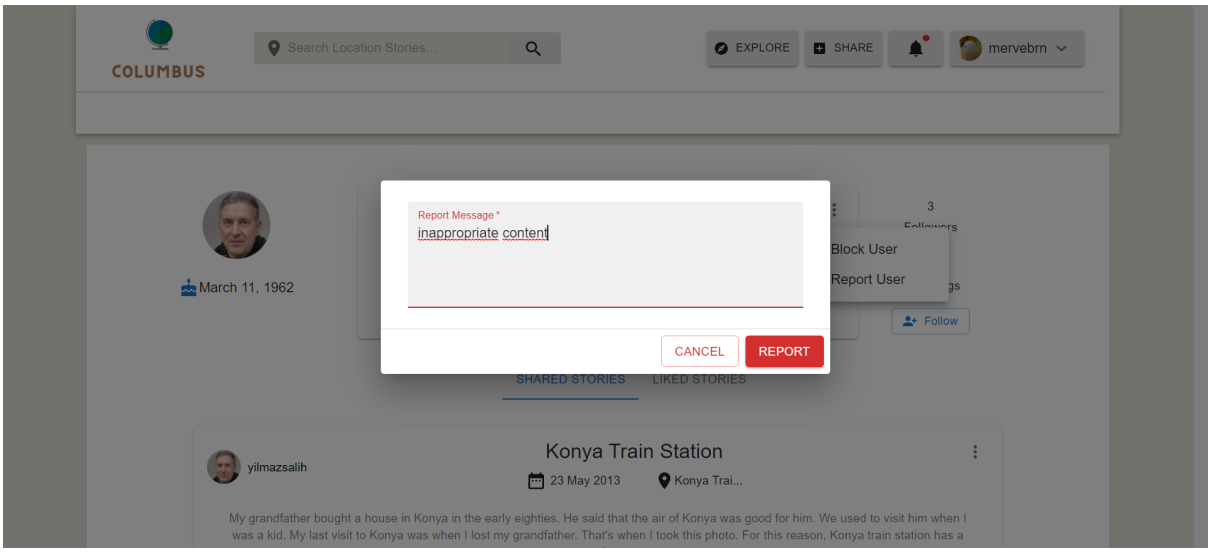
You can block a user by clicking the Block User button in the three dot icon.



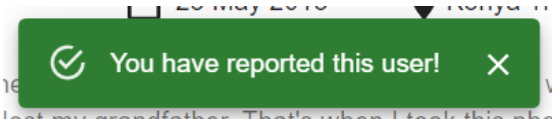
Report Other User

You can report a user by clicking the Report User button in the three dot icon. You may enter the reason for the report in Report Message field. This message will help admins to consider the report.

Report Message:



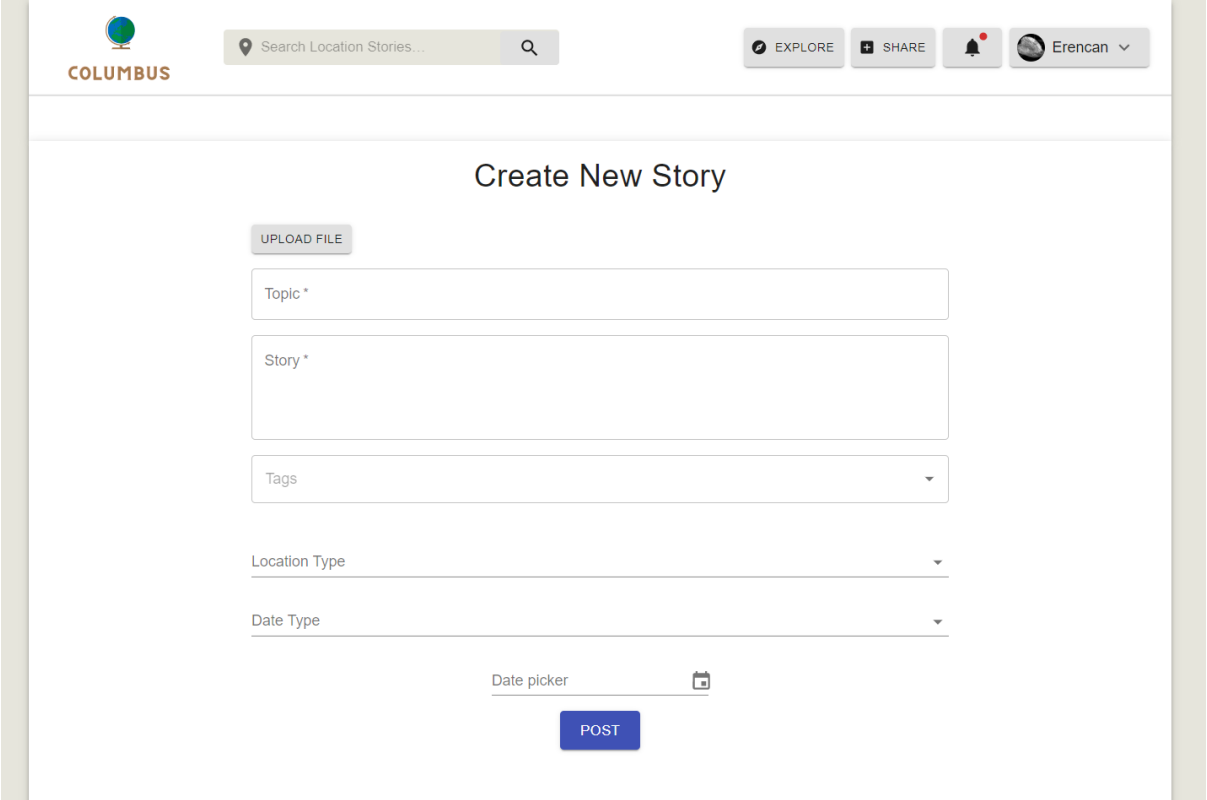
Successful Report Message:



SHARE STORY

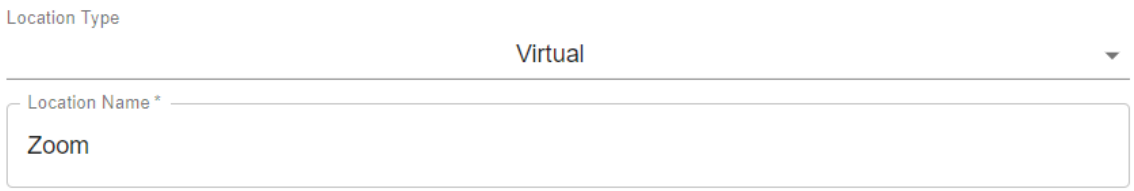
If you want to share a story, you should click the share button on the header. When you click that button, story creation page will open.

Share Page:



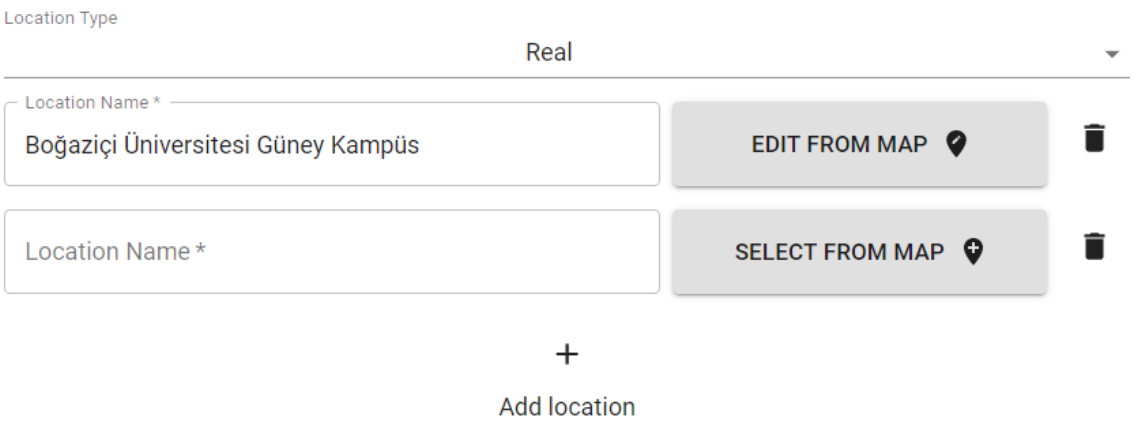
In our application, a user can create stories with selecting wide range of types of locations and dates. You can upload a photo with using "upload file" button. Topic, story, location and date fields are required. You can also add tags to your story but it is optional. You can choose two types of location: real and virtual. We added virtual locations considering that people have started to use social media and virtual meeting applications much more frequently lately. You can add "zoom" or "instagram" to your stories. You can add at most one virtual location to your stories.

Virtual location:



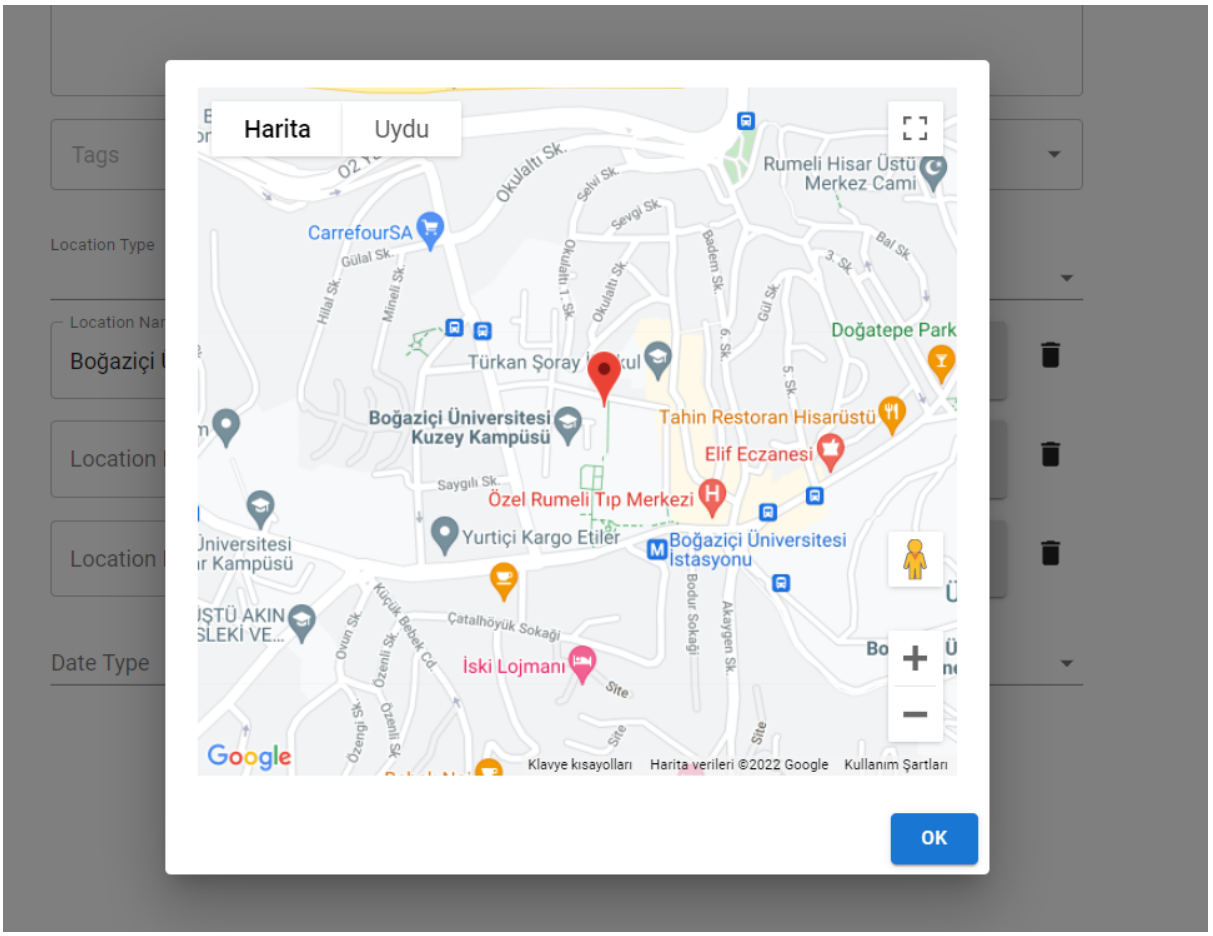
You can add at most three real locations to your stories. You should also pick a location from map to your real locations.

Real location:



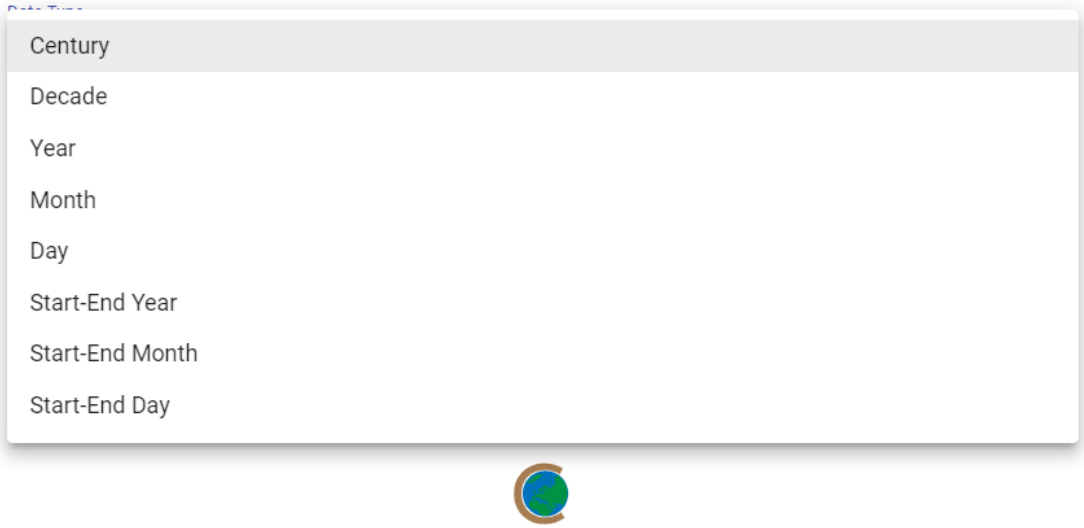
If you click the “Select from map” button, you can select a location from the map. You can also edit this location after adding it. If you click the garbage icon, the relevant location will be deleted from your story.

Location map:

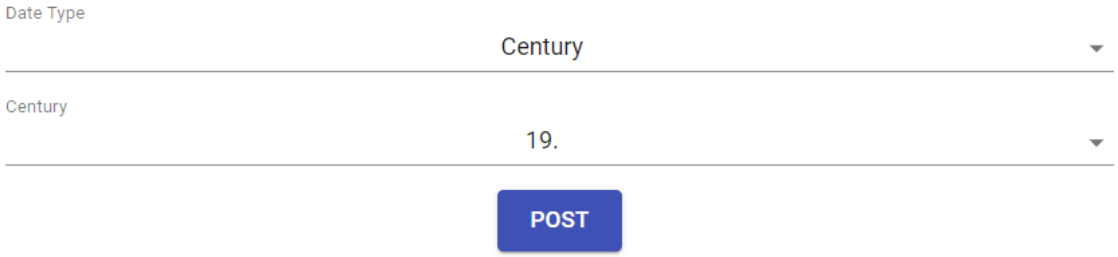


You can select one type of date from different kinds of dates. We offer century, decade, year specific, month specific and day specific dates. You can also select two dates from year specific, month specific and day specific dates.

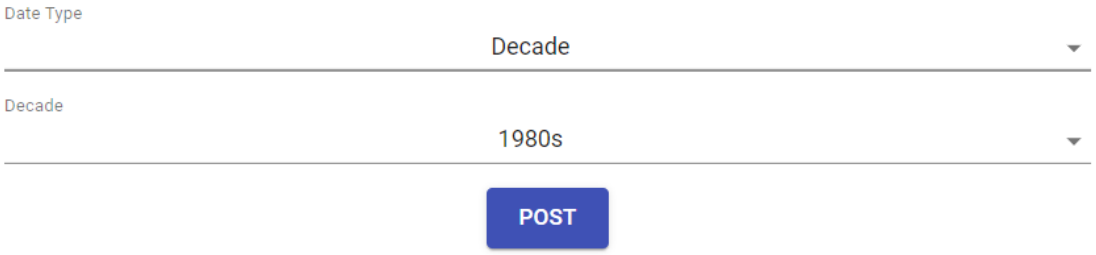
Date type selection:



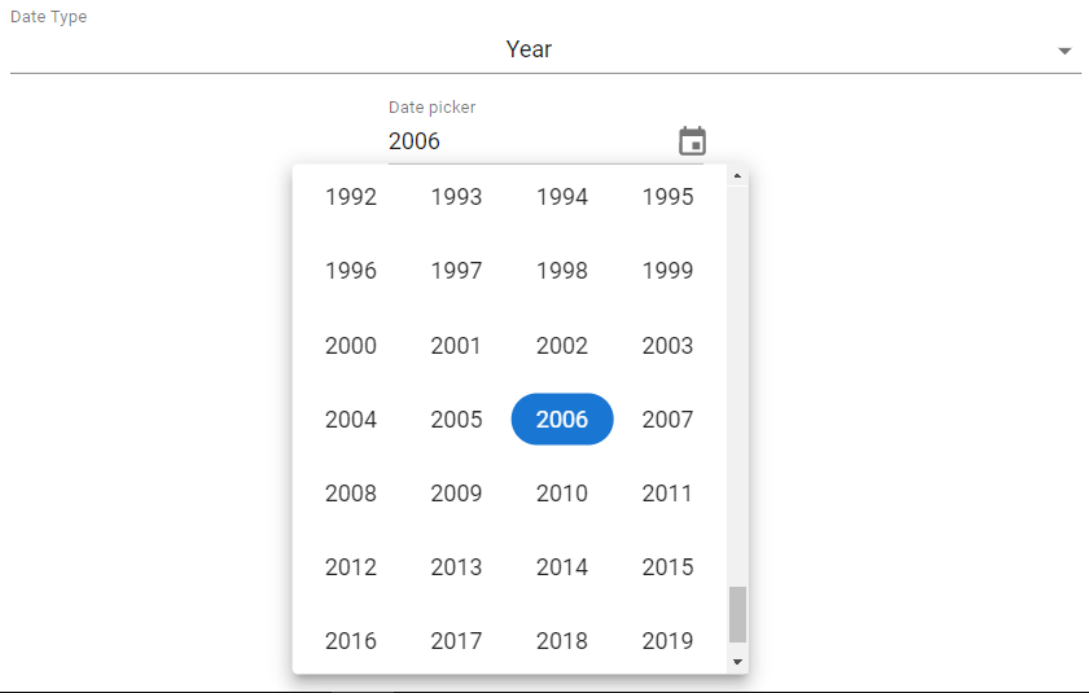
Century selection:



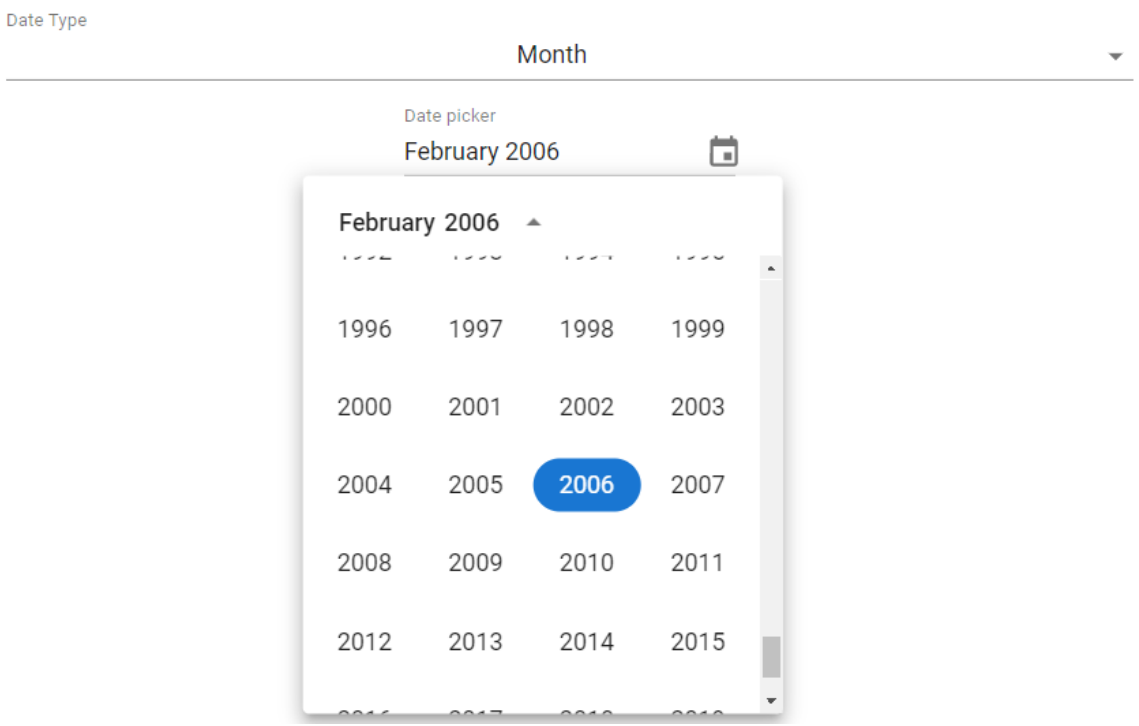
Decade selection:



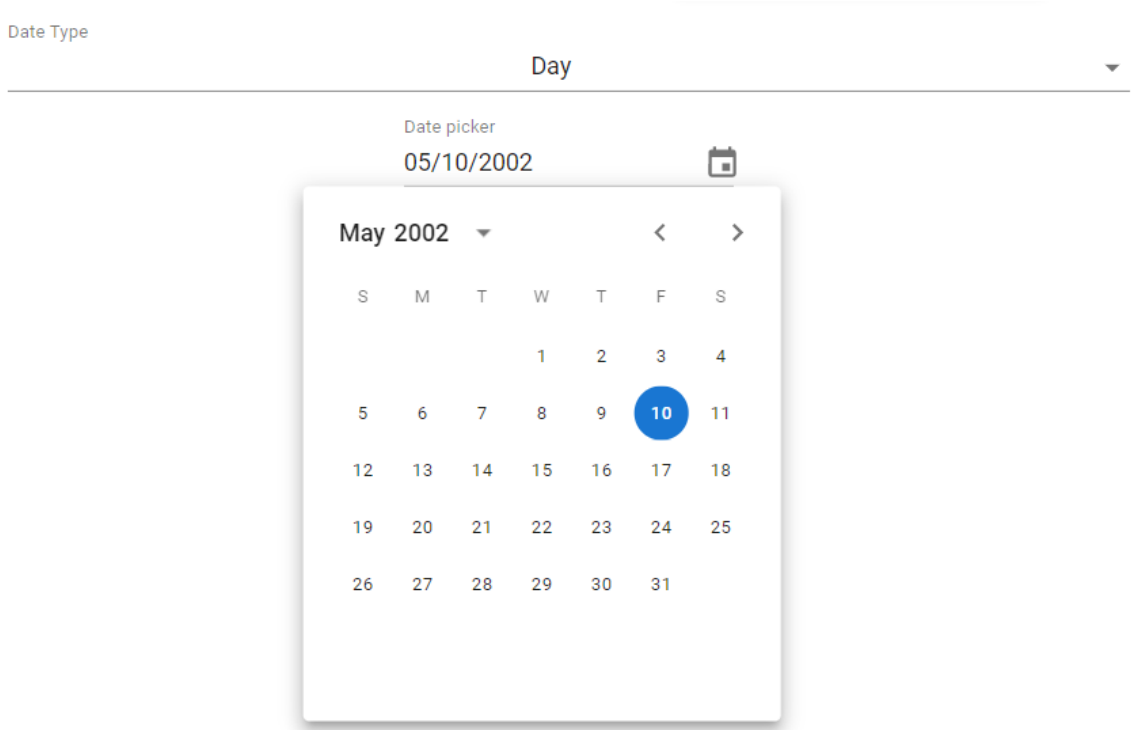
Year specific:



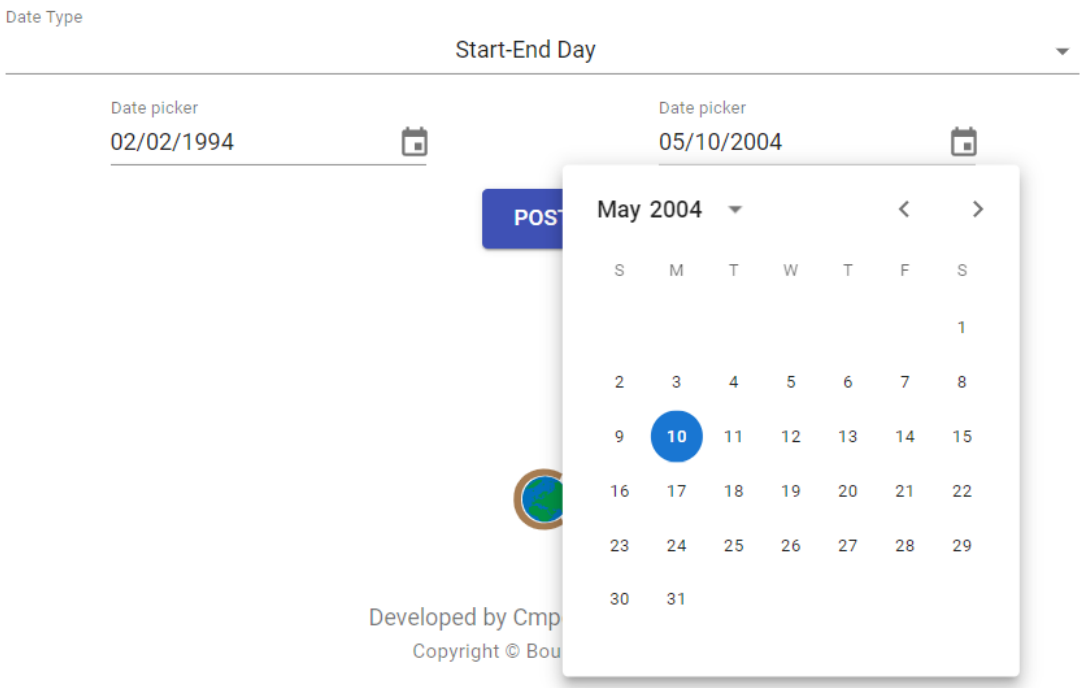
Month specific:



Day specific:



Start-end dates:

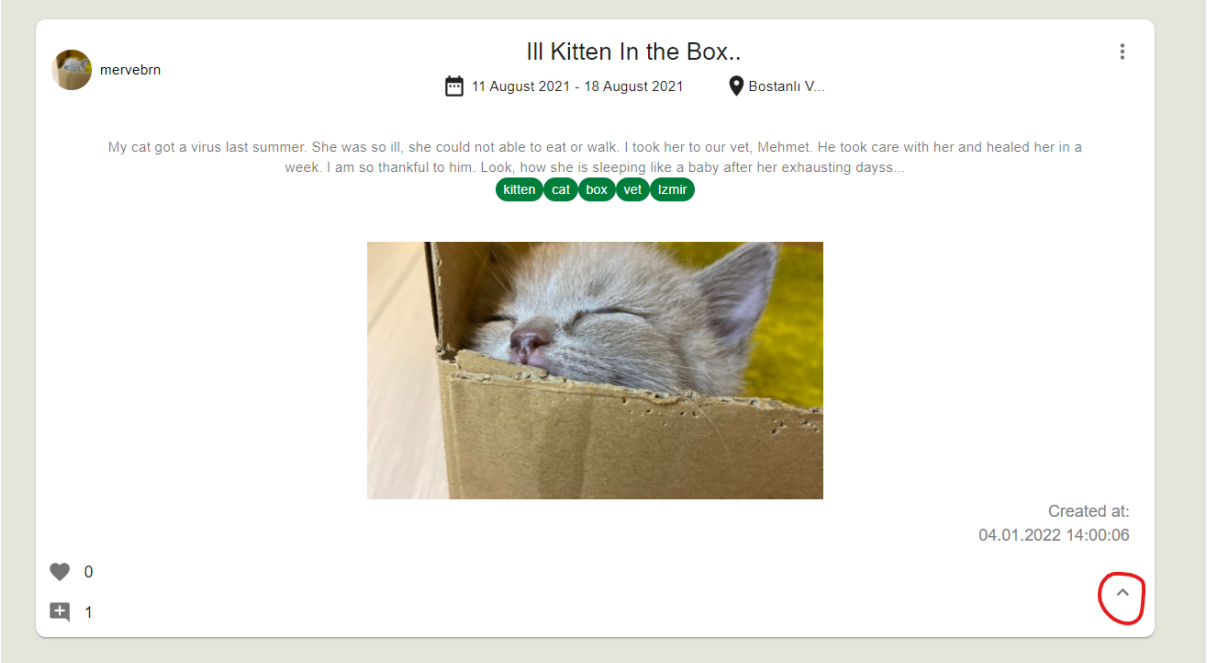


After selecting the date and location, you can share your story by clicking the "Post" button.

POST and COMMENTS

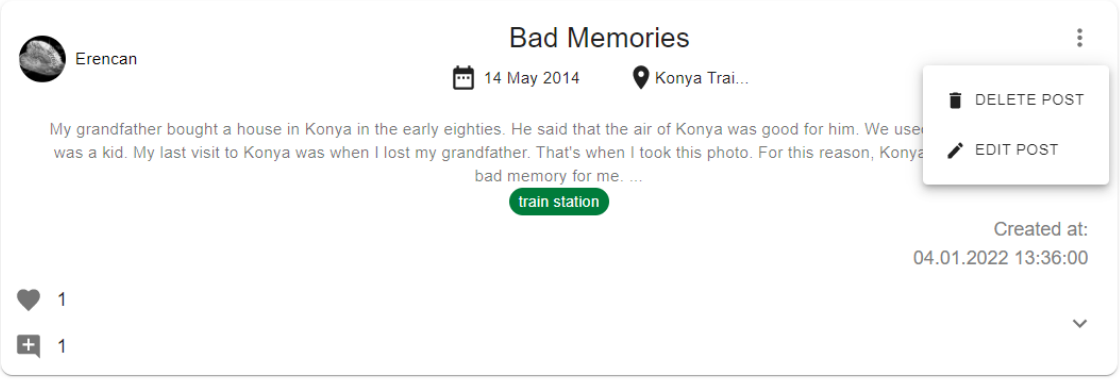
While you are navigating through pages, you will frequently encounter posts. Post is the main component of our application. You can see posts on your home page, explore page, search page and others profiles. If you click the arrow button on the lower-right of the post component, you can expand the story. You can view images and you can see the rest of the story, if any.

Expand story:



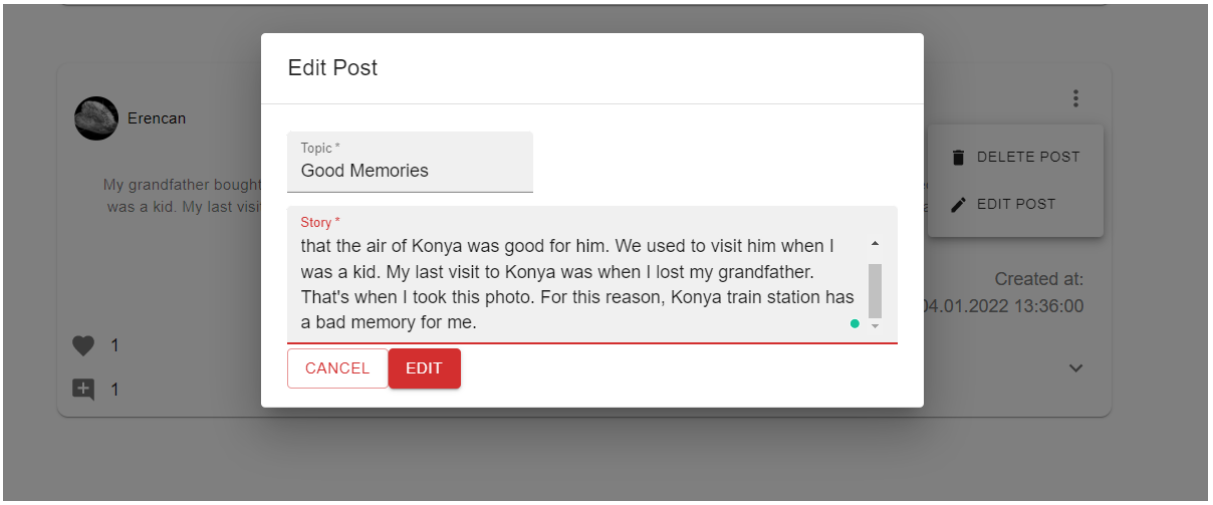
If a post belongs to you, you can edit or delete this post by using the three dots icon on the upper-right side of the post.

Settings of users own post:

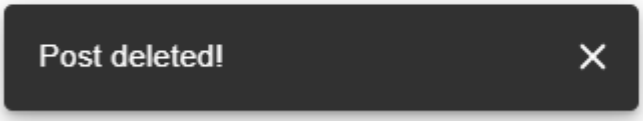


If you want to edit your post, you can click the edit post button. For now, we only offer editing for text and title parts. Date and location should be carefully selected in the creation step.

Edit post:

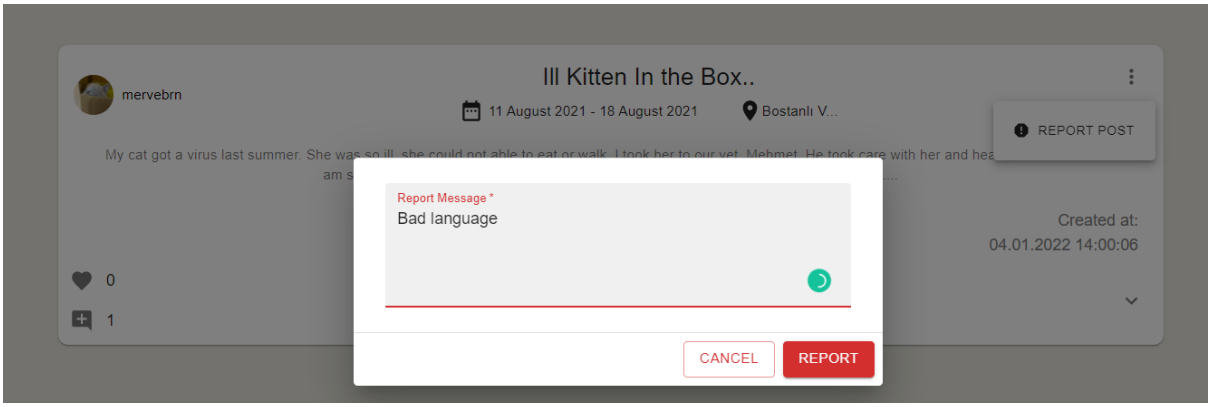


If you want to delete a post, you can click the delete post button. If this deletion is successful, you will see a message in the lower-left of your screen. Attention! your post will be immediately deleted.



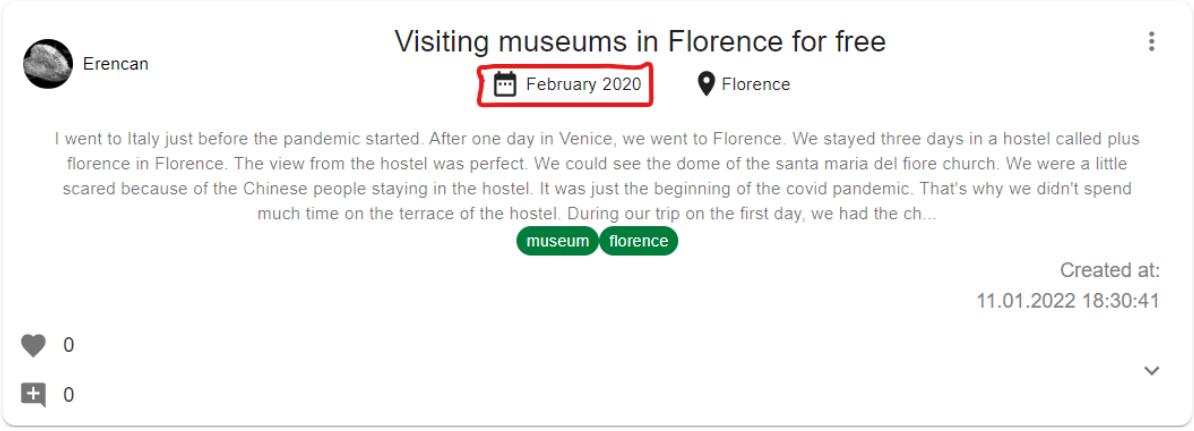
If you are viewing someone else's posts, press the three dots icon and the report post option will appear. You can report this post by writing your reason for reporting.

Post report:



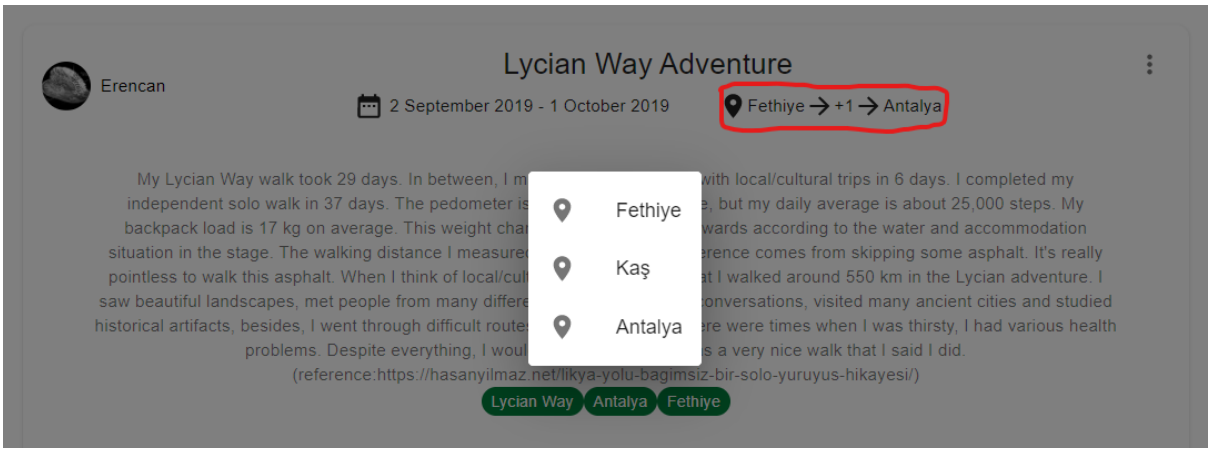
You can go to the date search page with clicking date part on the post component. This page will show you all the stories filtered with that story's dates.

Date of the post:



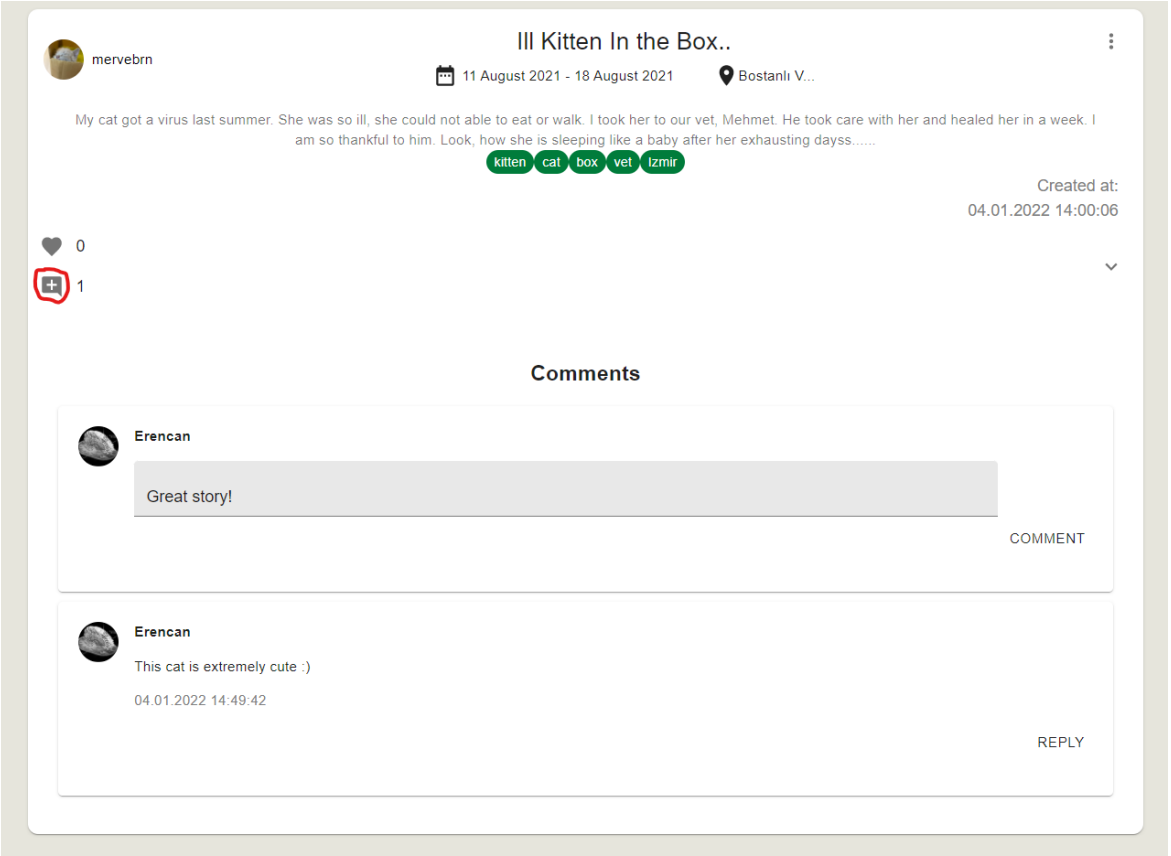
There can be multiple locations on a post. You can see all this locations with clicking the location icon under the title of a story. When you click a location, it will navigate you to the search page with location filter. Thus you can see stories on nearby locations.

Location of the post:



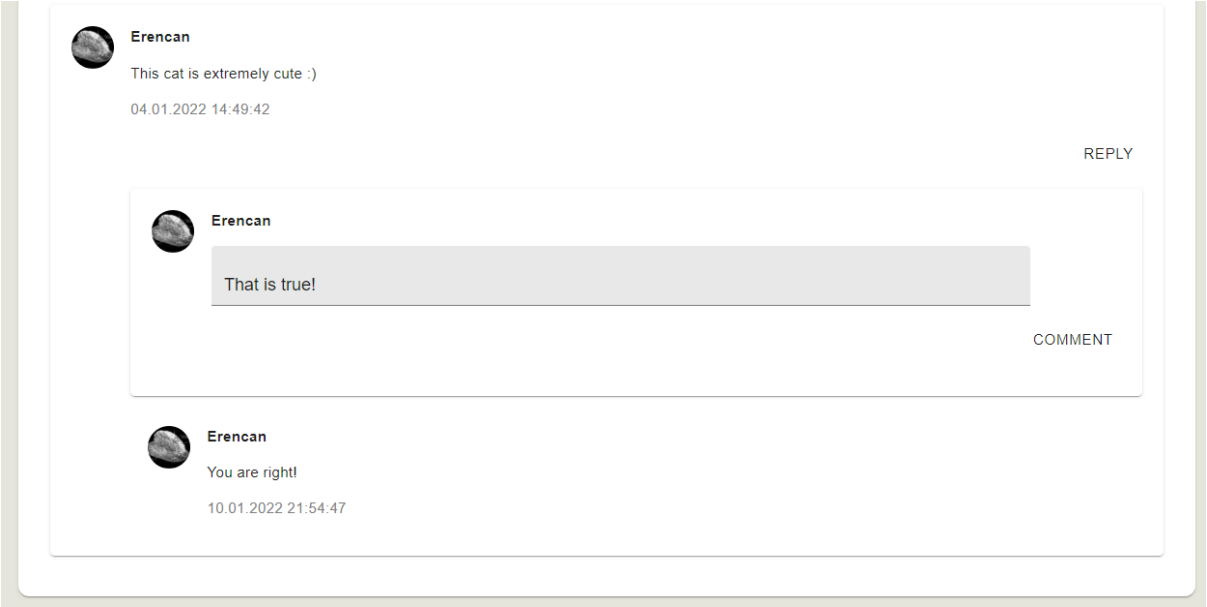
You can make comments on posts if you are a logged in user. You can basically click the plus button on the lower-left of the post component to view other comments. When you click this button, you can also see the comment field where you can write your comment. If you click the “comment” button, your comment will be added to that story.

Commenting:



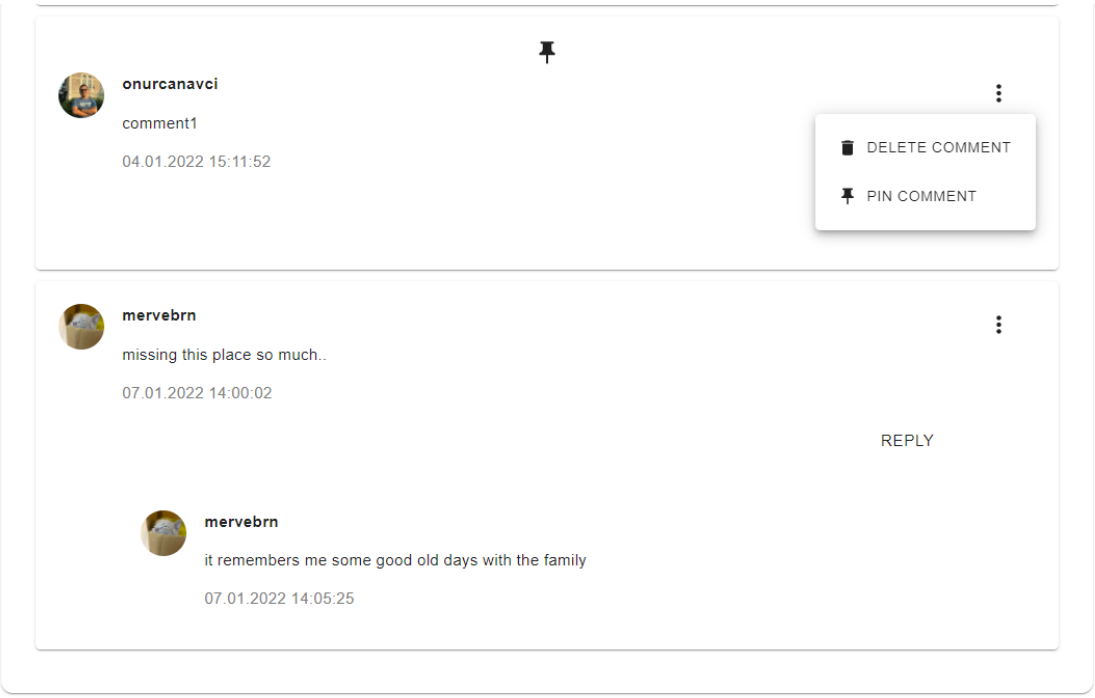
We have a comment reply feature in our app. You can reply to a comment with a comment. You should click the “reply” button on a comment, then you can click the “comment” button to add your reply.

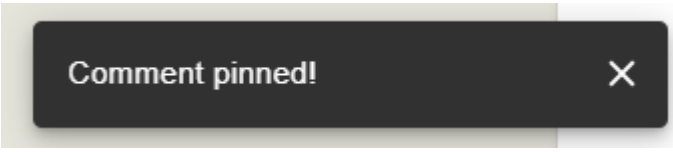
Comment reply:

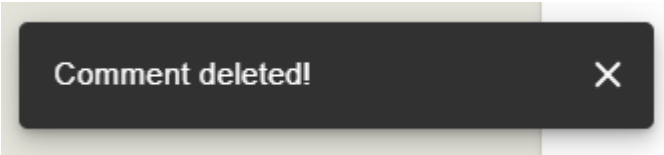


While viewing your own posts, you may notice that there is a three dots icon above the comments. You can reach delete and pin-unpin comment features from this icon. You can pin and unpin comments with using “pin comment” button. Pinned comments will appear in the first places on the comments section with a pin icon. If you don’t like a comment, you can delete it with using “delete comment” button. Attention! comment will be immediately deleted. When you delete or pin a comment, if there are not any problem, you can see a message on lower-left part of the screen. If there is a problem, this message box will state that.

Comments on users own posts:



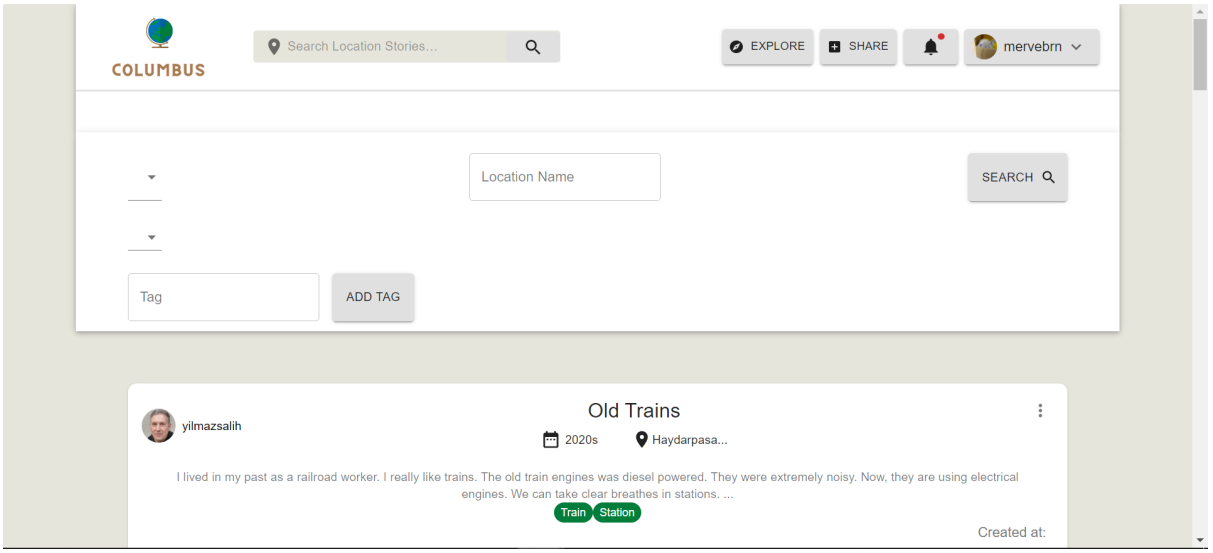




SEARCH and FILTER

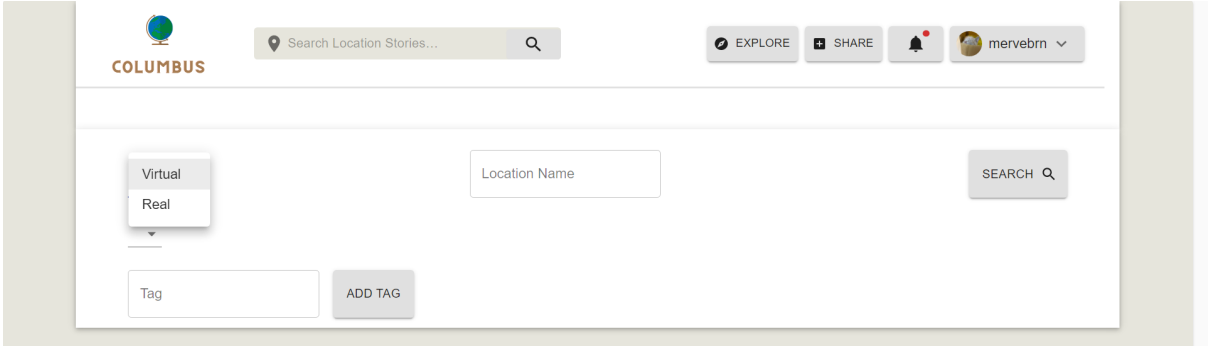
You can access Search page ***by clicking the Search icon in the header***.

Search Page:



Location Search

There are two types of location: Real and Virtual.



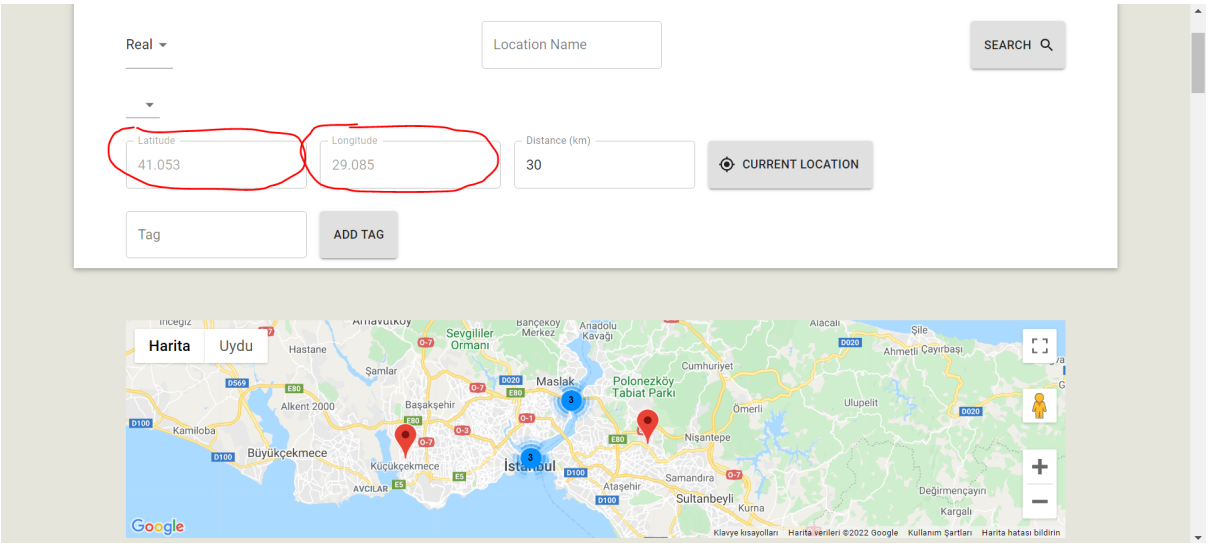
Real Location Search: When you select the Real Location option, you can view the map.

- Search based on pinned location
- Search based on current location
- Search based on clusters

Search based on pinned location

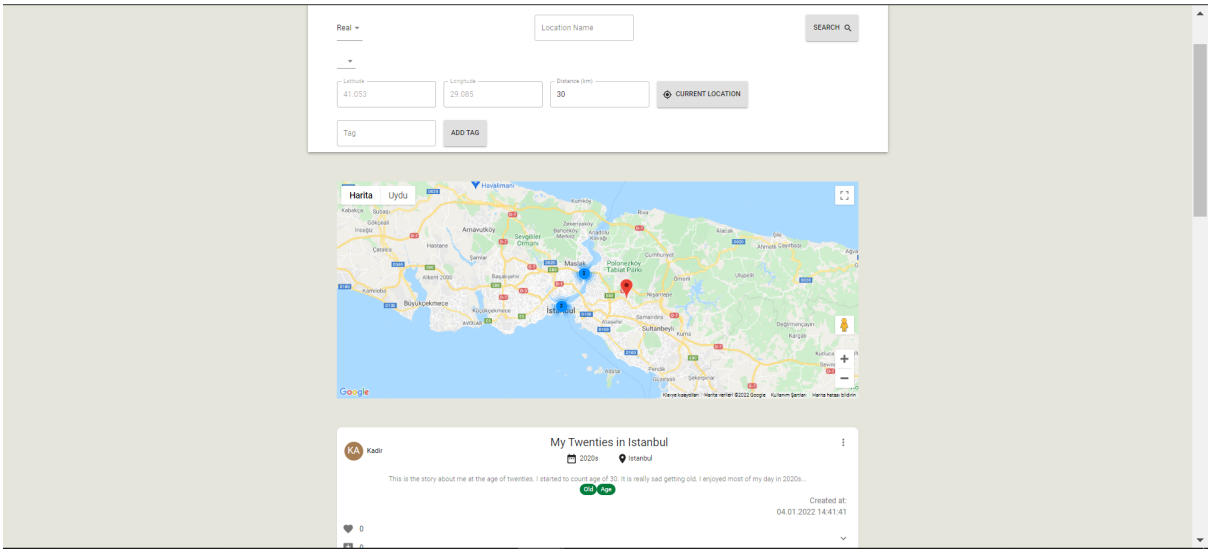
When you click somewhere in the map, its latitude and longitude are displayed in Latitude and Longitude fields.

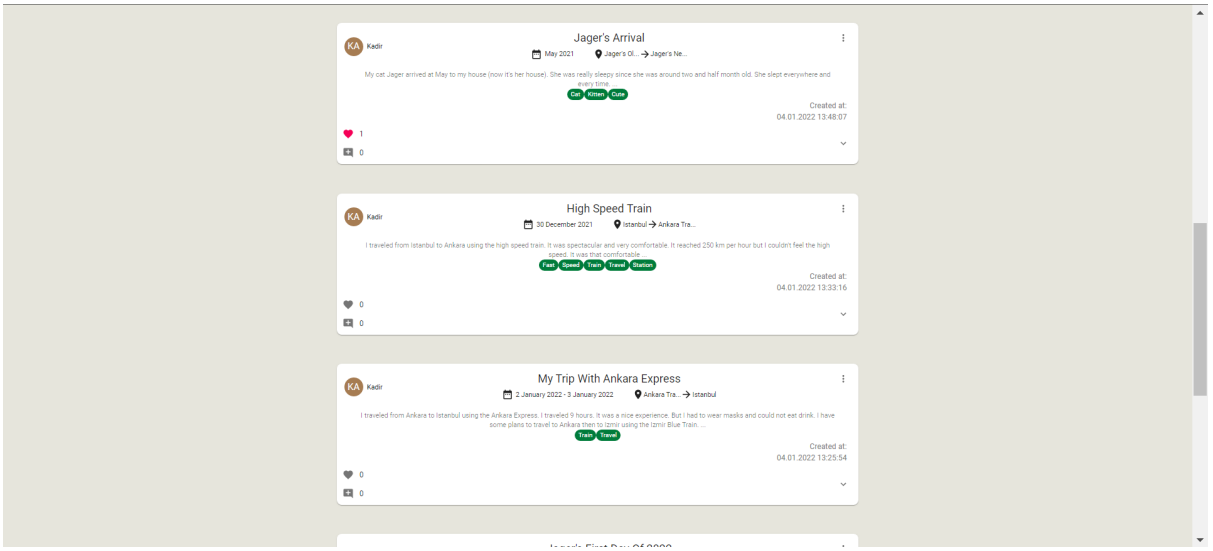
Pin a Location on Map:



After selecting coordinates, when you click the Search button, you can see stories shared in the selected area of given distance (30 km by default). You can change the distance in Distance field next to Longitude.

View Stories Around the Selected Area:





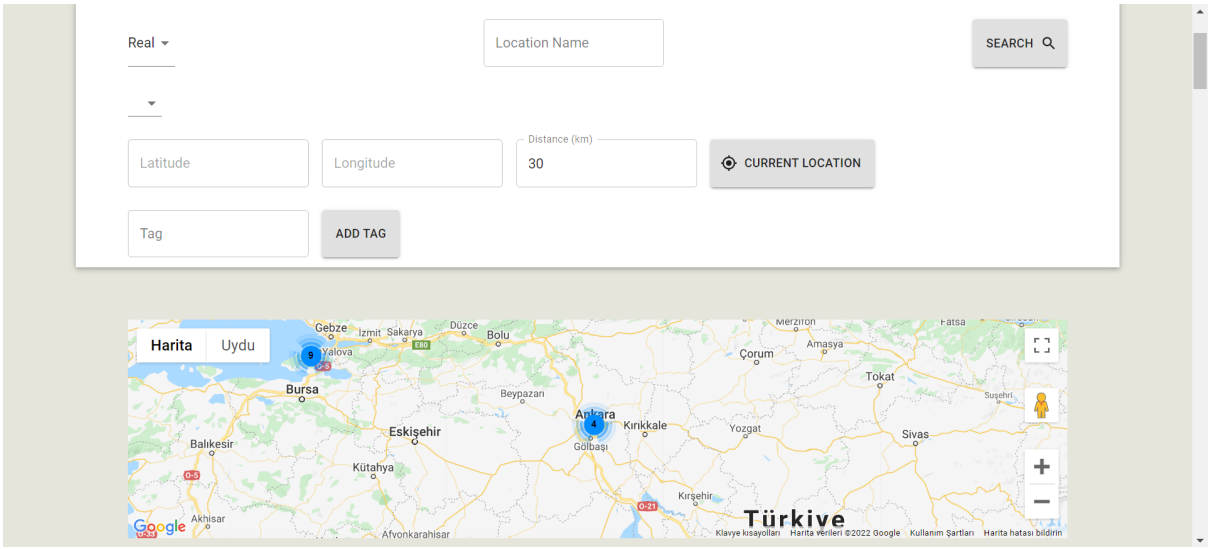
Search based on current location

You may want to search location stories around you without selecting your location on the map. You may use **Current Location** button to get the latitude and longitude of your location, then view stories around you by clicking the Search button.

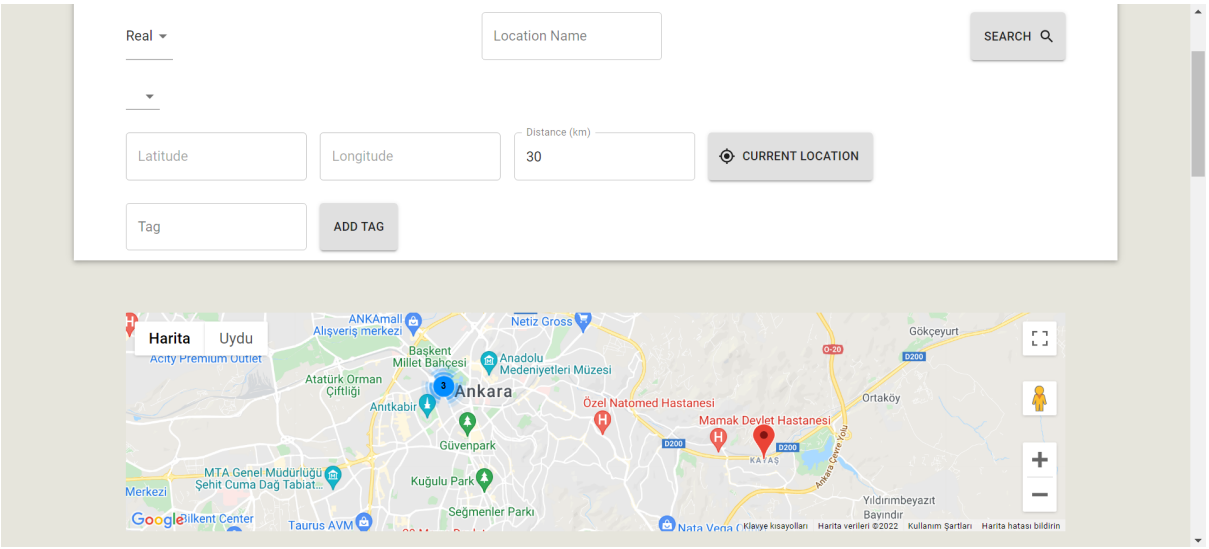
Search based on clusters

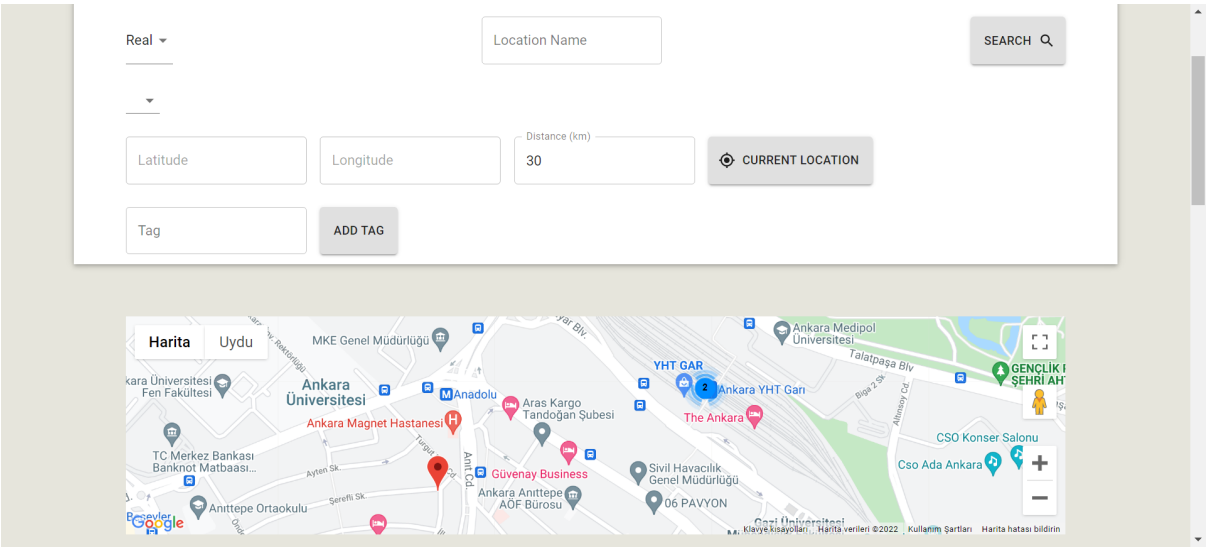
The stories shared around the same area are displayed as clusters in the map. You can see the number of stories shared around a location. When you click the number, you can see the locations of the posts more specifically.

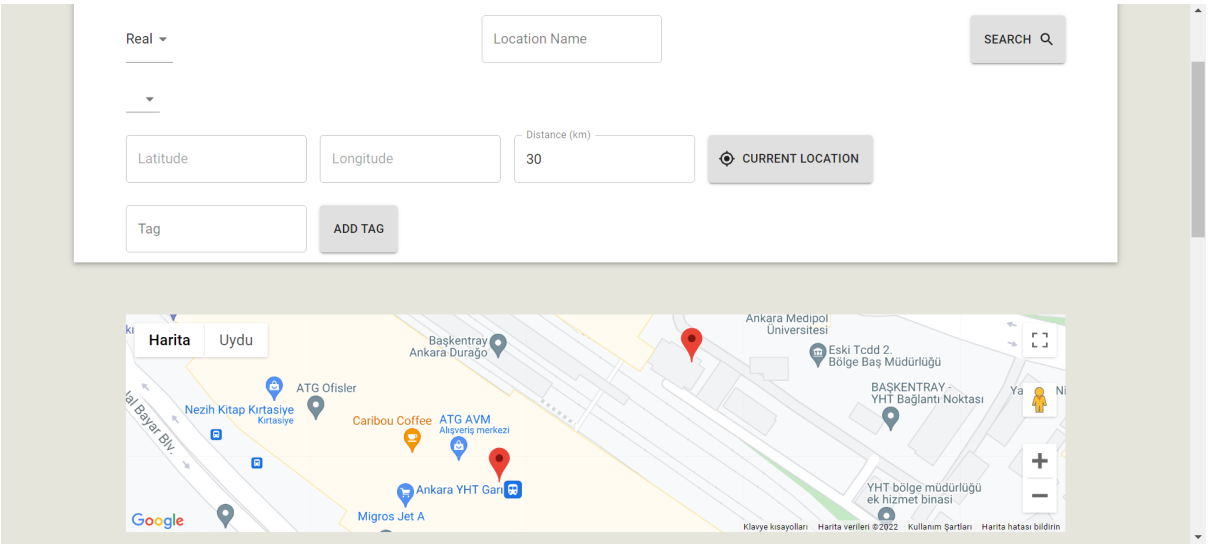
View Clustered Stories:
(There are 4 stories around Ankara)



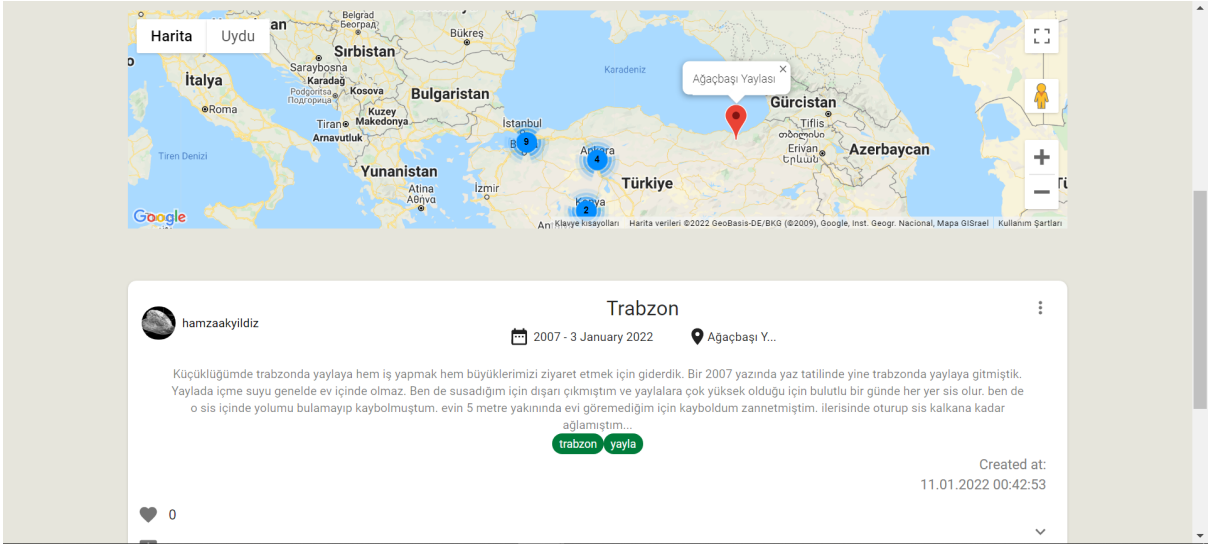
View Clusters in Detail:



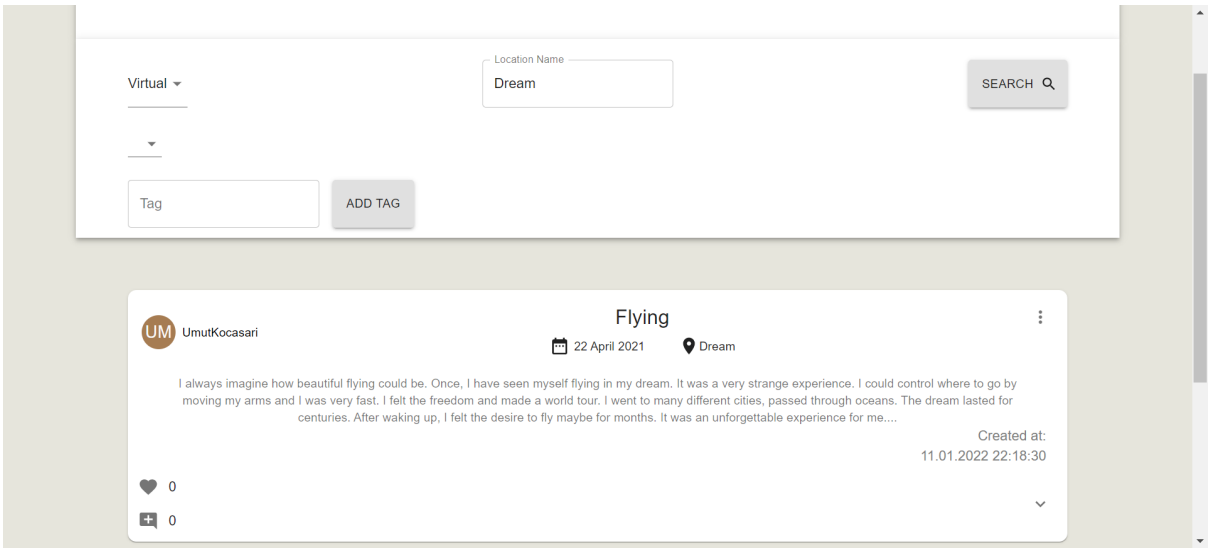




You can view the specific story when you click on the pin.



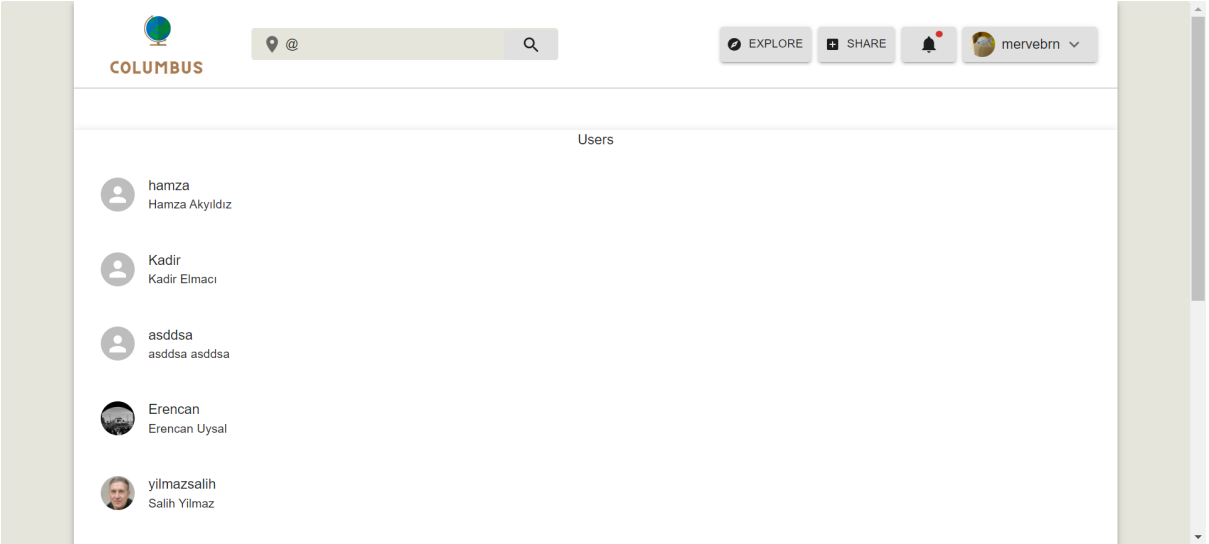
Virtual Location Search: You can select the Virtual option to search for locations that were not pinned on the map.
If you want to search for a specific keyword, you can enter it in the *Location Name* field then click Search button.
Virtual Location Search:



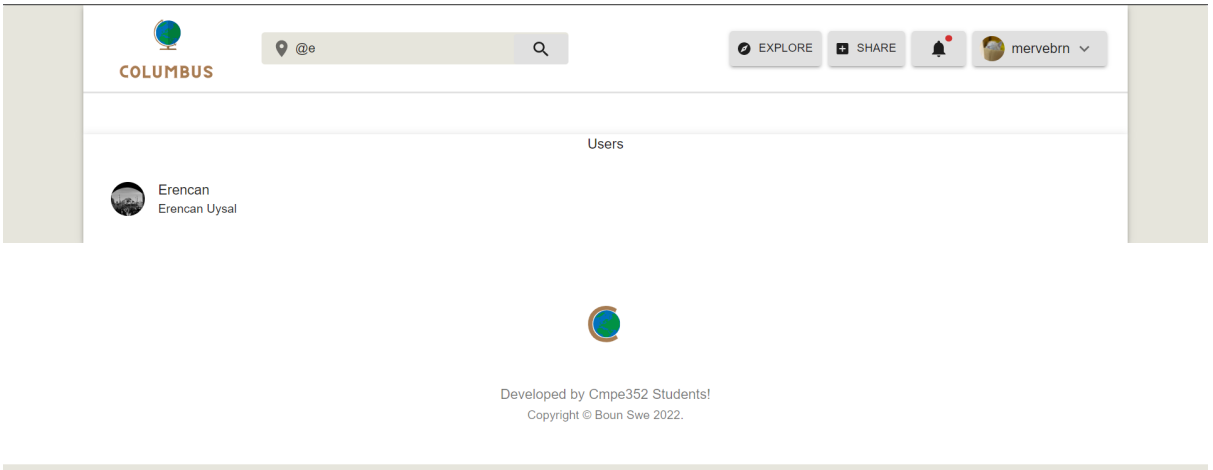
User Search

If you want to search for a specific username, you should start your search with the '@' character.

Example User Search 1:



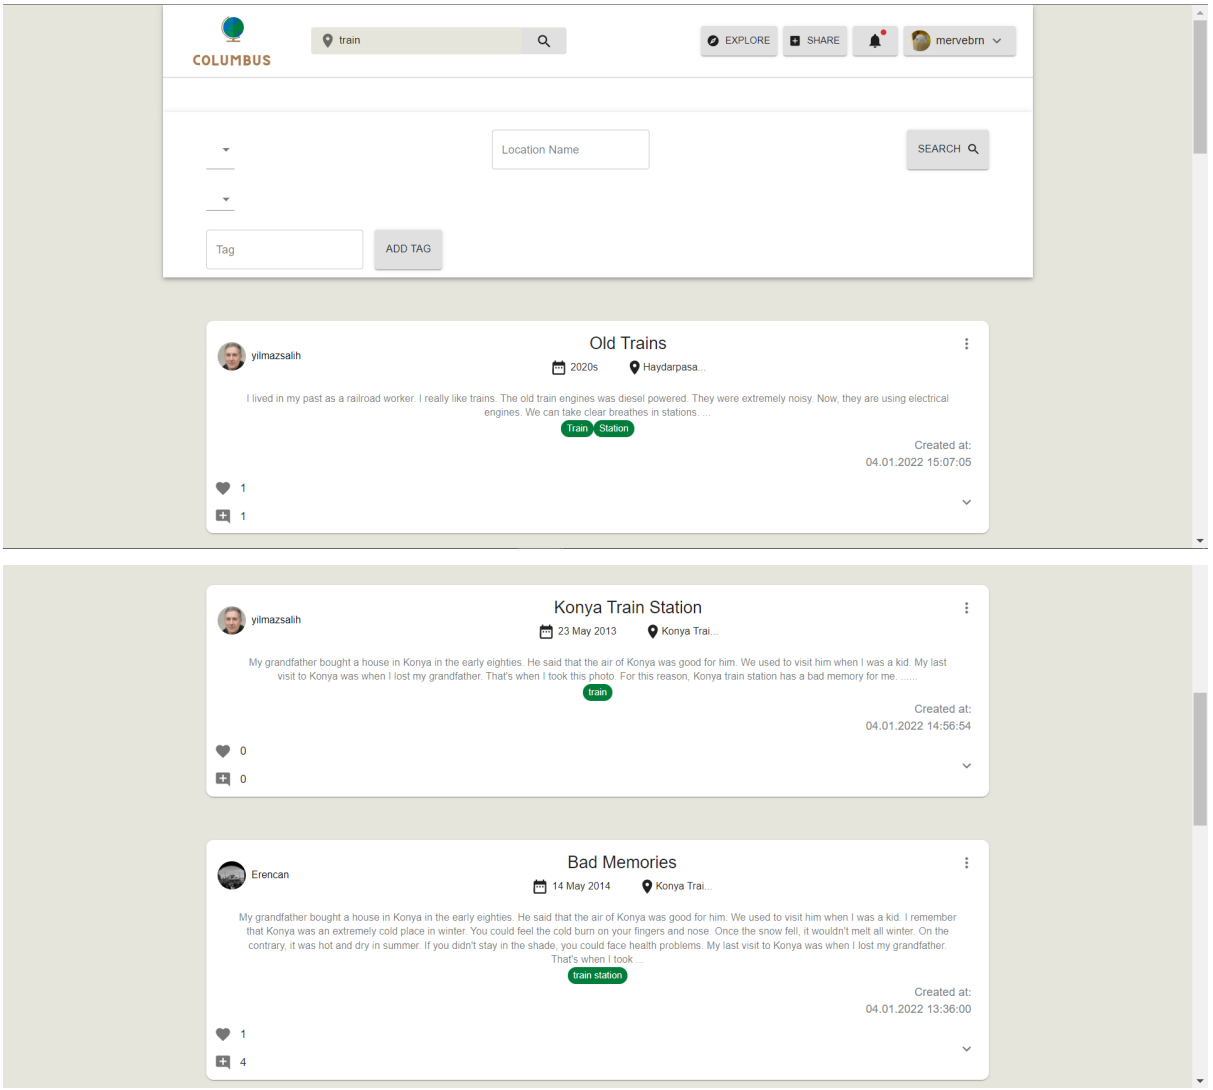
Example User Search 2:



Keyword Search

If you want to search for posts that contain a specific keyword, you should enter the keyword into the Search bar, then click the Search icon.

Example Keyword Search:



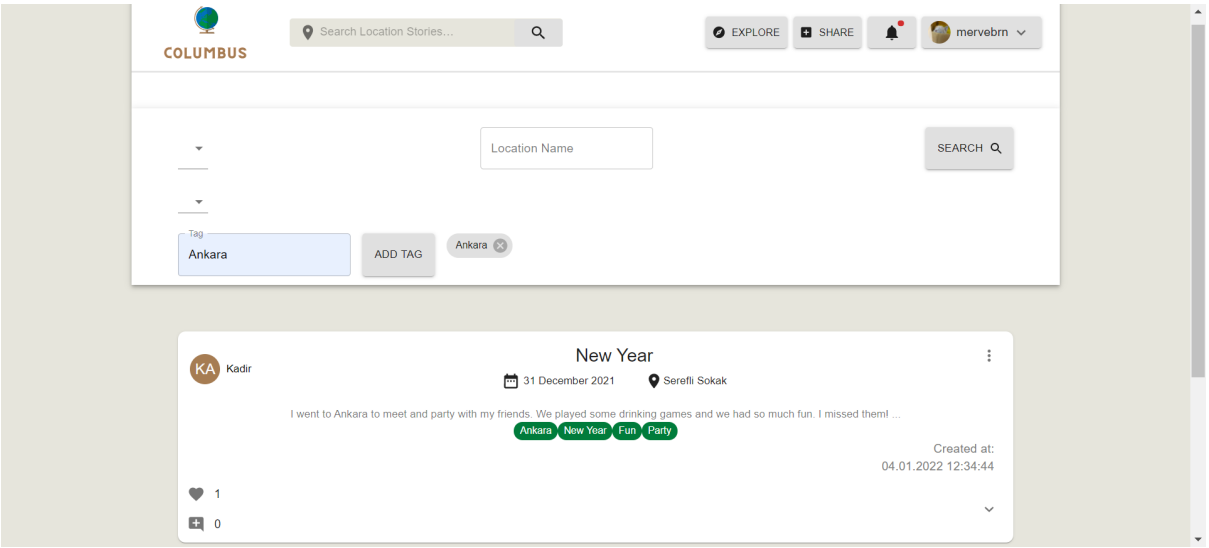
Filtering

You can filter search results. There are several filtering options.

- *Filter by Tag*
- *Filter by Time*

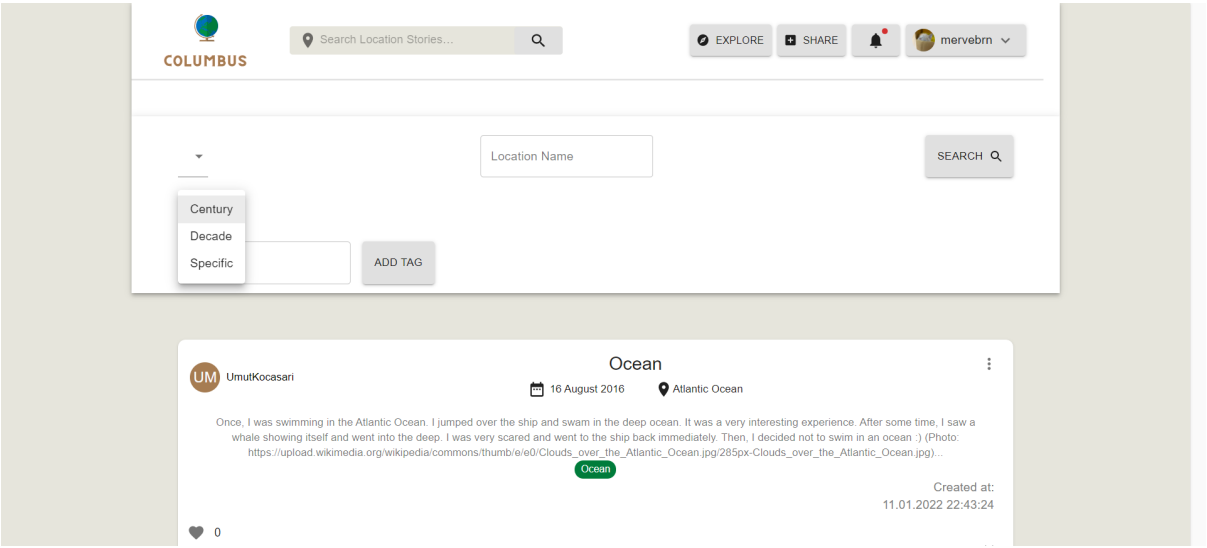
Filter by Tag: If you want to retrieve only the posts that have a specific tag, you can enter the tag into the Tag field and click ADD TAG button. If you press the Search button, only the posts with the entered tag will be displayed on the page.

Example Tag Filtering:

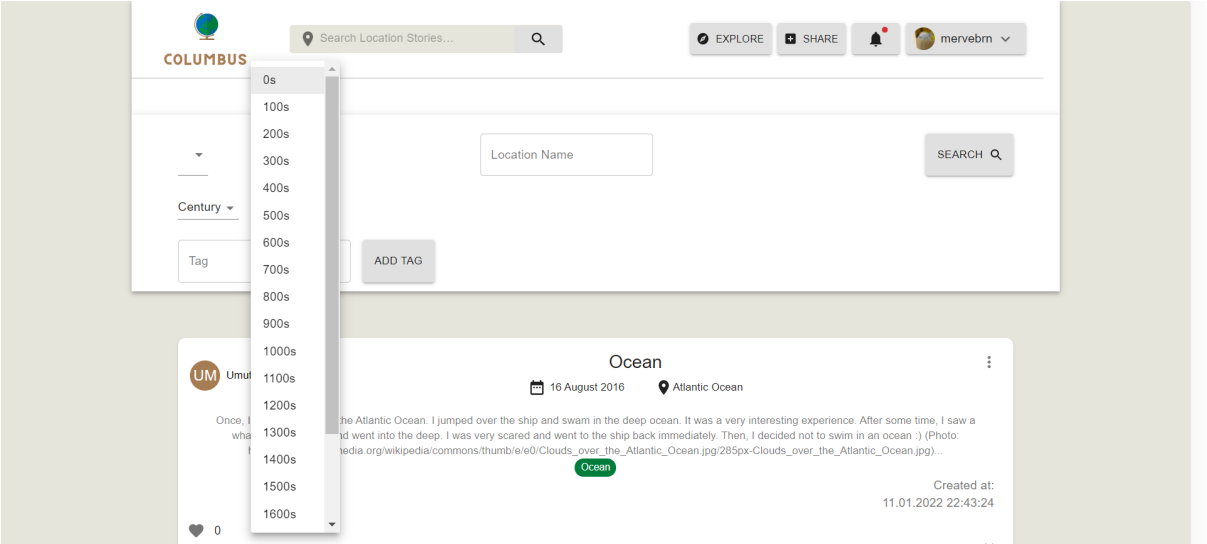


Filter by Time: If you want to retrieve only the posts with a specific time type (Century, Decade, Specific), you can select the type you want.

Time Type Filtering Options:

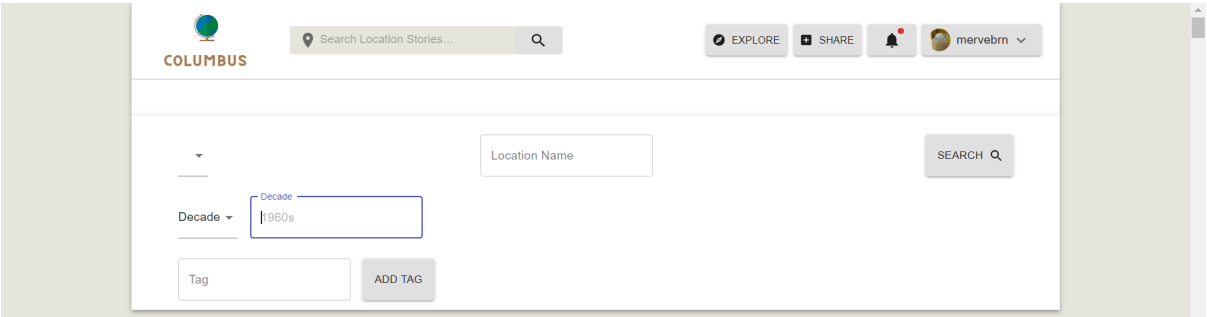


Century Filtering:



In decade filtering, you should add 's' after decade.

Decade Filtering:



In Specific Time Filtering, you must enter the start date, and the end date is optional. When you select year, month and day fields also will be displayed. They are optional.

Specific Time Filtering:

MOBILE

Guest

Before you register to Columbus, you are considered as '*Guest*' and able to perform a limited set of actions on the Web Site. However, you can not commit an action in Mobile Application as a guest. Hence, you should register and login by using credentials to use the mobile app. You can follow instructions in the next section (Login and Register) to register and login via mobile application.

Register:

If you do not have an account for Columbus or you want to make a fresh start to Columbus, you can register by using "Register Page". To reach this page, you can click highlighted text that says "Sign Up" on the landing page. First of all, you should fill in the required fields: username, email and password in such a way as to meet the specified conditions:

- Username must be unique.
- Passwords must be at least 8 characters.
- Email must be valid

If these restrictions are not met, the register button will not be active, or you will be notified with a pop up. Then, you can try with other combinations of username and email.
In case of success, you need to activate your account. We will send you an email for activation. You can complete this process by clicking on the link in the email.

Login:

If you already have an account for Columbus, you can directly login with your username and password. To perform login, at first, you should type your username and password in corresponding fields correctly. After that, clicking the "Sign In" button will redirect you to "Home Page" (to be mentioned in next pages).

After this process, you will not need to enter this information every time you want to access the application. We will keep your credentials in a secure way.

If you have security and privacy concerns about the application, you can check this website also: https://support.google.com/android/?hl=en#topic=7313011

Home Page and Post Details:

When you login the application, then the home page will be open you can view the stories of users you follow. In each card, you can see details of each story: Where this story takes place, username and profile picture of who shared this story, first three lines of the story and when the story was shared (relative to you).

By clicking highlighted text saying “See More”, you can see the features of the stories in detail on the page that opens. In addition to information on a card, you can see the whole story and location or locations for this story on the map below.

By sliding the screen down, you can refresh your feed.

For a story that you think is harmful for the community, you can share your problem with us by clicking the three dots icon in the upper right corner of the card.

Bad Memories
Konya Train Station
14 May 2014
My grandfather bought a house in Konya in the early eighties. He said that the air of Konya was good for him. We used to visit him when I was a kid. My last visit to Konya was when I lost my grandfather. That's when I took this photo. For this reason, Konya train station has a bad memory for me.

You can interact with people by commenting and liking.

When you click on the bubble icon at the bottom right of the card, you can view the comments, make comments for the story, reply to the comments as comments, and interact with the comments by pressing and holding them for a while for the story you clicked.

To make a comment for a story, you should write down your comment in the text section at the bottom of the screen. After that, clicking the “Comment” button with blue color on the right will send your comment.

During the interaction phase:

- You can edit or delete your own comments
- You can report others’ comments
- You can pin comments if the story holding the comments belongs to you

To edit the comment, you can press the edit button in the popup that opens, make changes in the text section that opens, and press the confirmation button.

To delete the comment, you can confirm the statement in the warning section that will open by pressing the delete button in the popup.

To pin or unpin the comment, just press the pin or unpin button, relatively, in the popup that opens.

To report the comment, you can press the report button in the popup that opens, write down your problem with the comment in the text section that opens, and press the confirmation button.

To reply to the comment, just press the reply button in the popup that opens, then follow instructions for commenting. An informative text will appear on the left side of the text section so you can distinguish who you are replying to. You can cancel your replying action just by clicking this text.

Notification Page:

To reach this page, you can click on the bell icon in the upper right corner of the homepage. This page consists of two separate sections where you can view your follow requests and your or others' activities.

You can accept or reject the requests of users who want to follow you in the follow requests section by pressing the corresponding buttons. As you can see below, you will be notified with a popup according to your reactions.

In the activity section, you can see your and other users' activities and when these acts occur such as pinning, liking, commenting, following and sharing.

Search Page:

You can jump to the search page with the navigation bar always at the bottom of the screen. There are 3 sections on this page where you can use different search methods.

In the user section, you can find users by entering the word or words you want to search for in the text section of the user section and then pressing the search button. Also, by pressing each result, you can go to users' profile pages.

The story section is designed for detailed search of the stories shared in the application. In this section, you can search by filtering the stories as content, time and tag.

If you want to do your search only as the content of a story, just enter the word or words in the text area in the upper part you want to search and press the "Search" button. If results can be found, you will be able to see these results as a list from the bottom section and you will be able to interact with the results like on the home page. If there is no result, you will see a text that says "No Result Found".
If you want to do a search by filtering the tags, you need to press the tags in the view that appears after pressing the "Add Search Filter" button. Next, you will see a text field where you can enter the tags you want to search. After entering each tag in this field, you can proceed by confirming it. After completing this part, you can apply tag filters by pressing the "Apply" button.

You can see it by looking at the boxes under the "Add Search Filter" button where the filters are applied. If you click on these boxes, the filter of the box you clicked will be canceled.

If you want to search for the date a story happens, when you click on the add search filter, you need to proceed by selecting the date part on the screen that appears. You can filter the stories in this range by selecting the start or end time or both on the screen that will appear. Boxes will appear when the filter is applied.

Old Days of Bogazici
Bogazici University
It is hard to believe that we study at 150 years old buildings. When one hears about that or sees the buildings, it does not seem very different however when we look at the old photos, we see how different their surroundings are. I felt very strange when I saw the pictures of my school after seeing the old buildings a lot of times. The pictures told us the surrounding of our campus were much more natural and authentic. (Photo: https://i.pinimg.com/originals/e9/96/8a/e9968a3eee35e301e73faf8700a394aa.jpg)

Create Story Page:

This screen is designed for you to share your stories. You need to create the story you want to share according to the following rules:

- You should enter a topic to related text area
- You should enter your story to related text area
- You should enter a location. It could be a virtual or real location.
- You should enter a date. It could be interval, decade, century or single date.
- You may add tags to your content
- You may add a photo to your content.

To add a photo to your story, you need to click on the upload File button at the top. Next, you need to select the photo you want to upload from your phone's photo library. At this stage, your operating system may request access to your photos for the first time. After this step, if the upload process is successful, the photo you upload will be displayed in the area under the upload file button.

To specify a location in your story, you first need to choose the type of location as "virtual" or "real". If you have chosen a virtual location, it is sufficient to specify the name of the location in the text field that appears. If you want to specify a real location, you need to select a location by clicking on the map that appears in addition to this. You can use the buttons to zoom in and out on the map. After selecting a location, you can change the location by moving the marker, or you can finish adding a location by clicking the "Save" button.

Here's what you need to do to put the date in your story:

- Firstly select date type: century, decade, interval, or specific
- Then, type or select dates according to your date type selection.

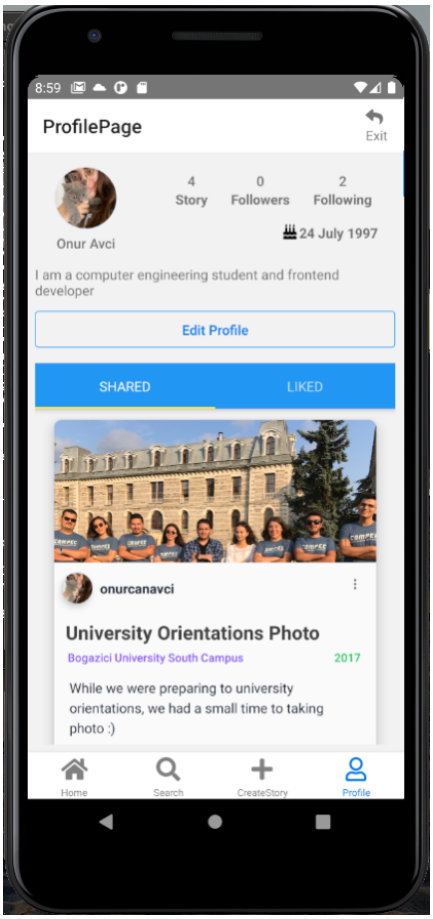
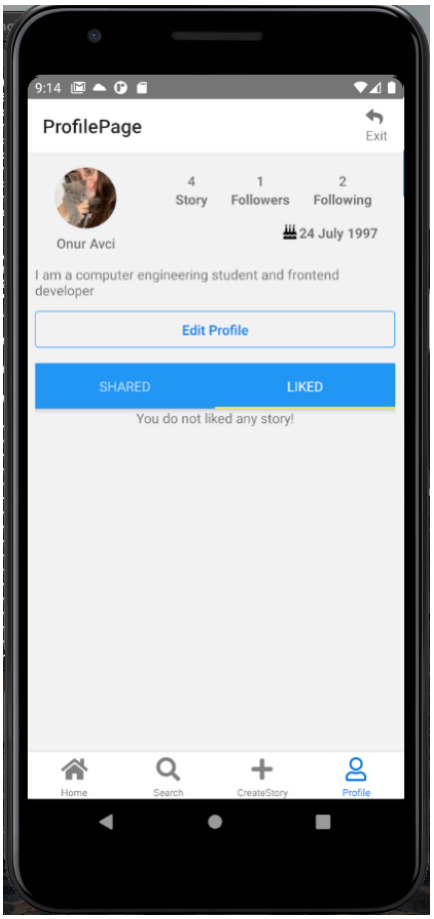
Profile Page:

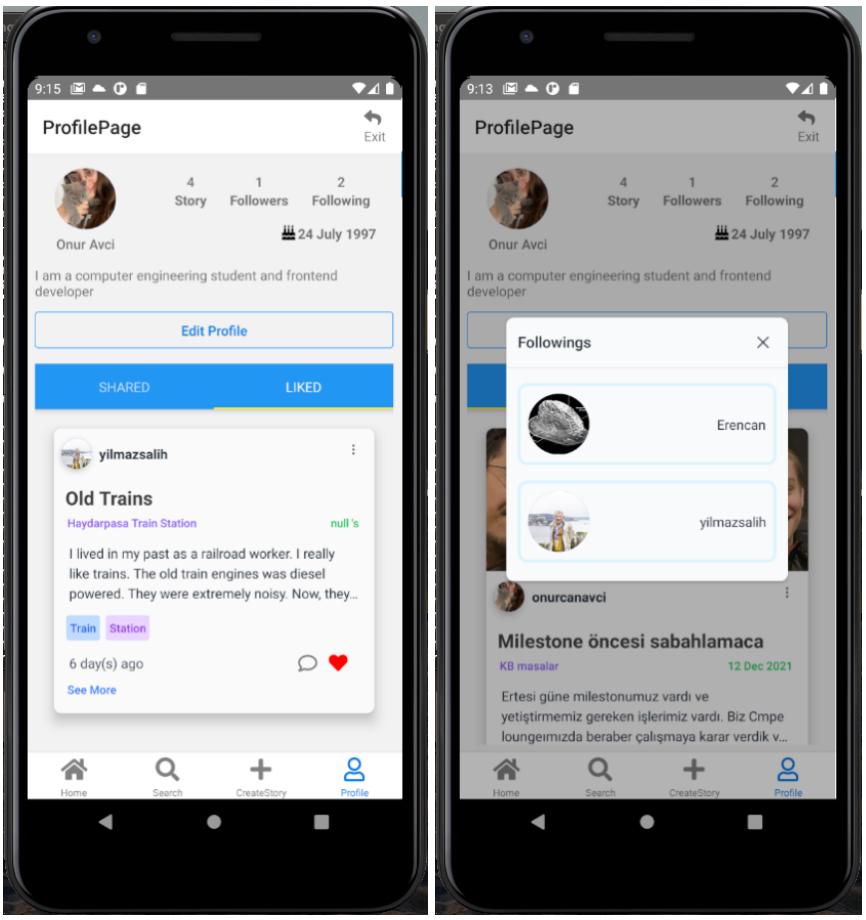
You can reach your own profile page by clicking the icon on the far right from the navigation bar below. On this page, you can view their followers and following by clicking on the part where the numbers are shown. You can go to the profiles of the users by clicking the profile cards in this section.

You can view the stories you have shared and liked separately.

When you press the “Edit Profile” button, it will take you to another screen where you can edit your profile and information.







To reach the profiles of others, you can go to their profiles by clicking on the usernames in the story cards, the user search section, and the followers and followers section.

To reach the profiles of others, you can go to their profiles by clicking on the usernames in the story cards, the user search section, and the following and following sections. On these pages, you can still see the posts shared and liked by the user, unless the user's profile is private.

Here, you can set whether you follow the user or not. In addition, you can block or report the user from the menu that appears when you click the button on the top right.
